may only construct the improvement if the county has an agreement with a telecommunications service provider to provide service, facilities, plants, or systems in the area in which the improvement will be constructed. The improvement must then be owned, operated, and maintained by the telecommunications service provider. Neither the county nor the district created by the county is authorized to provide telecommunications services under the agreement or to have any right or interest in the service improvement.

The bill exempts a rural county with a population of fewer than 50,000 inhabitants from the requirements and limitations imposed on counties seeking to establish a local improvement district to fund a telecommunications service improvement.
