A BILL FOR AN ACT

CONCERNING TRANSPORTATION FUNDING.

Bill Summary

(Note: This summary applies to this bill as introduced and does not reflect any amendments that may be subsequently adopted. If this bill passes third reading in the house of introduction, a bill summary that applies to the reengrossed version of this bill will be available at http://leg.colorado.gov.)

Section 15 of the bill requires a ballot question to be submitted to the voters of the state at the November 2017 statewide election that seeks approval for the state to temporarily increase the rate of the state sales and use tax for 20 years beginning in 2018. If the voters approve the temporary sales and use tax rate increase, the new revenue generated is allocated solely for transportation infrastructure funding purposes, with specific projects to be funded required to be included in the 2017 ballot information booklet provided to the voters of the state, as follows:

Shading denotes HOUSE amendment. Double underlining denotes SENATE amendment.
Capital letters indicate new material to be added to existing statute.
Dashes through the words indicate deletions from existing statute.
$300 million annually to the state highway fund for use by the department of transportation (CDOT); and

Of the remaining new revenue:

- 70% to counties and municipalities in equal total amounts; and
- 30% to a newly created multimodal transportation options fund (fund).

If the voters approve the temporary state sales and use tax rate increase:

CDOT may issue up to a specified amount of transportation revenue anticipation notes (TRANs) for the purpose of funding transportation projects that are part of CDOT’s strategic transportation investment program and are on CDOT’s priority list for funding and the transportation commission must covenant that amounts it allocates on an annual basis to pay TRANs shall be paid: First, from $50 million from any legally available money under its control other than the new sales and use tax revenue; next, from the new sales and use tax revenue; and last, if necessary, from any other legally available money under its control any amount needed for payment of the TRANs until the TRANs are fully repaid;

The revenue allocations to counties and municipalities are further allocated to each county and municipality in accordance with certain existing statutory formulas used to allocate highway users tax fund (HUTF) money to each county and municipality;

The existing statutory requirement that at least 10% of the sales and use tax net revenue and other general fund revenue that may be transferred or appropriated to the HUTF and subsequently credited to the state highway fund must be expended for transit purposes of transit-related capital improvements is repealed;

A transportation options account and a pedestrian and active transportation account are created in the fund and the transportation commission is required to designate the percentages of fund revenue to be credited to each account subject to the limitations that for any given fiscal year no more than 75% of the revenue may be credited to the transportation options account and at least 25% of the revenue must be credited to the pedestrian and active transportation account;

A multimodal transportation options committee of gubernatorial appointees representing transit agencies, transportation planning organizations, local governments,
and CDOT is created as a type 1 agency within CDOT for the purpose of allocating the money in the transportation options account of the fund for transportation options projects throughout the state. Under the supervision and guidance of the committee, the transit and rail division of CDOT is required to solicit, receive, and evaluate proposed transportation options projects and propose funding for interregional transportation options projects. Any transportation options project receiving funding from the transportation options account of the fund must also be funded by at least an equal total amount of local government, regional transportation authority, or transit agency funding.

CDOT is required to allocate the money in the pedestrian and active transportation account of the fund for projects for transportation infrastructure that is designed for users of nonmotorized mobility-enhancing equipment;

Transfers of 2% of general fund revenue to the HUTF that are scheduled under current law to be made for state fiscal years 2017-18, 2018-19, and 2019-20 are eliminated;

The state road safety surcharges imposed on motor vehicles weighing 10,000 pounds or less are reduced for the same period during which the rates of the state sales and use taxes are increased. The resulting reduction in state fee revenue is taken entirely from the share of such fee revenue that is kept by the state so that county and municipal allocations of such revenue are not reduced.

CDOT must annually report to the joint budget committee, legislative audit committee, house transportation and energy committee, and senate transportation committee regarding its use of TRANs proceeds and must post the reports and certain user-friendly project-specific information on its website; and

The transportation revenue anticipation notes citizen oversight committee is created to provide oversight of the expenditure by the department of the proceeds of additional TRANs. The committee must annually report to the transportation legislation review committee regarding its activities and findings.

Be it enacted by the General Assembly of the State of Colorado:

SECTION 1. Legislative declaration. (1) The general assembly
hereby finds and declares that:

(a) It is critical to construct, improve, and maintain transportation infrastructure throughout the state in order to meet the demands created by both current and future statewide economic expansion and population growth;

(b) Sufficient, sustainable, steady, and dedicated funding streams are needed to fund the critical transportation infrastructure construction, improvement, and maintenance that will allow the statewide transportation system to meet both current and future demands;

(c) Current sources of dedicated transportation funding are not generating enough revenue to fund current and future transportation infrastructure needs throughout the state. The state last increased the rates of the taxes on gasoline and special fuel, the largest source of dedicated transportation funding, in the early 1990s, and these taxes do not increase with inflation. As a result, the declining purchasing power of the revenue generated by these taxes has prevented the state's transportation budget from keeping pace with the growing transportation infrastructure needs throughout the state.

(d) An additional source of voter-approved funding for transportation is needed to meet statewide transportation infrastructure funding needs.

(2) The general assembly further finds and declares that all new voter-approved transportation funding will be spent throughout the state to:

(a) Address poor road and bridge conditions like potholes and rough pavement that damage vehicles, require vehicle owners to pay for expensive vehicle repairs, and increase costs for Colorado families;
(b) Reconstruct and rehabilitate state highways to better maintain them and prevent and avoid costly future repairs;

(c) Support local government efforts to fund local transportation projects that are critical for their communities;

(d) Improve highways to increase their capacity and accommodate population growth;

(e) Provide additional seasonal maintenance on state highways;

(f) Address increased traffic congestion through multimodal transportation options;

(g) Allow the state's growing population of seniors to age in place and provide greater mobility for persons with disabilities; and

(h) Invest in the economic future of the state by providing a modern multimodal statewide transportation system that will support and strengthen the economy of the state and attract more businesses and employers to the state.

SECTION 2. In Colorado Revised Statutes, 24-1-128.7, add (8) as follows:

24-1-128.7. Department of transportation - creation - repeal.

(8) The multimodal transportation options committee created in section 43-4-1104 (1) shall exercise its powers and perform its duties and functions as if the same were transferred by a TYPE 1 TRANSFER, as defined in section 24-1-105, to the department of transportation.
