<b>Future Year Impacts:</b> None.		

**Summary of Legislation**

The bill, *as amended by the House Finance Committee*, increases the amount of total on-hand inventory of medical marijuana that a medical marijuana licensee can purchase from another medical marijuana center from 30 percent to a percentage of at least 30 percent set in rule by the Marijuana Enforcement Division in the Department of Revenue.

**Background**

**Medical marijuana regulation.** Under the medical marijuana code, businesses that grow, transport, process, test, and sell retail marijuana are licensed by the Marijuana Enforcement Division. The medical marijuana code requires that cultivation, processing, manufacturing, and sales of medical marijuana share a common ownership. This type of market regulation is known as vertical integration. As of January 1, 2017, the medical marijuana market included the following numbers of licensees that will be subject to this bill:

- 528 Medical Marijuana Centers;
- 751 Optional Premises Cultivations; and
- 254 Medical Marijuana-infused Products Manufacturers.

Statewide in calendar year 2016, there were approximately 73,500 transfers from medical marijuana cultivation facilities and 33,500 from medical marijuana centers. The 30 percent limit for a marijuana business on transfers from one licensee to another is evaluated over a 12 month period of sales.

## State Expenditures

This bill increases workload for the Marijuana Enforcement Division in FY 2017-18 to set the percentage of total medical marijuana inventory that can be transferred between licensees. This workload can be accomplished within existing resources.

## Effective Date

The bill takes effect August 9, 2017, if the General Assembly adjourns on May 10, 2017, as scheduled, and no referendum petition is filed.
