practitioner may electronically prescribe opioids.

Current law allows health care practitioners and other individuals to query the prescription drug monitoring program (program). The bill requires health care practitioners to query the program before prescribing the first refill prescription for an opioid except under specified circumstances, and requires the practitioner to indicate his or her specialty or practice area upon the initial query.

The bill requires the department of public health and environment to report to the general assembly its results from studies regarding the prescription drug monitoring program integration methods and health care provider report cards.
