Summary of Legislation

Under current law, school districts may operate induction programs for teachers, special services providers, principals and administrators, as well as alternative licensure programs for teachers and principals. The bill clarifies that charter schools and the state charter school institute (CSI) may also operate induction and alternative licensure programs.

Background

Induction programs offer professional development for an educator with an initial license, and lead to a recommendation for a professional license. Alternative licensure programs offer teacher preparation for a person holding an alternative teacher or principal license and result in a recommendation for a professional license by the district or board of cooperative educational services. Charter schools and the CSI currently offer induction and alternative licensure programs if approved by the Colorado Department of Education (CDE); as a result, the bill codifies existing practice into law.

State Expenditures

In FY 2018-19 only, the bill increases workload for CDE to adjust rules and materials related to induction and alternative licensure programs. The workload increase is expected to be minimal and can be accomplished within existing appropriations.

Effective Date

The bill was signed into law by the Governor on April 2, 2018, and takes effect August 8, 2018, assuming no referendum petition is filed.
