SENATE BILL 19-063

CONCERNING A STRATEGIC ACTION PLAN TO ADDRESS INFANT AND FAMILY CHILD CARE HOME SHORTAGES IN COLORADO.

Bill Summary

(Note: This summary applies to this bill as introduced and does not reflect any amendments that may be subsequently adopted. If this bill passes third reading in the house of introduction, a bill summary that applies to the reengrossed version of this bill will be available at http://leg.colorado.gov.)

The bill requires the department of human services (department), in consultation with the early childhood leadership commission (commission) and various stakeholders, to draft a strategic action plan addressing the declining availability of family child care homes and infant child care.

The bill requires the department to submit the completed strategic
action plan to the commission, the state board of human services, the joint budget committee, the health and human services and education committees of the senate or any successor committees, and the public health care and human services and education committees of the house of representatives or any successor committees no later than December 1, 2019.

Be it enacted by the General Assembly of the State of Colorado:

SECTION 1. Legislative declaration. (1) The general assembly finds that:

(a) Family child care homes provide an essential element of the child care network in both urban and rural areas of the state;

(b) In certain counties, there are no child care centers, making family child care homes the only option working families have for licensed child care;

(c) Eighty-nine percent of child care businesses in the nation are owned by women, making the viability of child care businesses an important component of the state's economic success;

(d) Many parents prefer family child care homes, where children experience a home-like environment conducive to healthy and safe development;

(e) The state has a shortage of licensed, safe, and affordable child care options, and there is a growing need for child care facilities due to the increase in working parents;

(f) Since 2010, the state has experienced a decline of one thousand five hundred eighty-two family child care homes, at an average of approximately two hundred family child care homes closing each year; and

(g) Because infant child care is more often provided in family
child care homes than in child care centers, the decline of family child
care homes has resulted in over seven thousand three hundred fewer
infant slots in the state in 2018 than in 2010.

(2) The general assembly declares, therefore, that it is necessary
that the state department, in consultation with the early childhood
leadership commission, study the decline of family child care homes and
available infant child care in the state to identify the reasons for these
shortages and to recommend strategies for improving the recruitment and
retention of family child care homes and available infant child care
throughout the state.

SECTION 2. In Colorado Revised Statutes, add part 2 to article
