March 15, 2019

the information in a report and submit the report to the state board of education and the education committees of the general assembly.

The existing statute requires a school district, group of school districts, board of cooperative services, or the state charter school institute that seeks to authorize a multi-district online school to first obtain certification for the multi-district online school from the department. Under the bill, if an existing multi-district online school changes authorizers, the new authorizer must obtain a new certification of the multi-district online school.

Under existing law, an online school is subject to the same accountability requirements as apply to other public schools. The bill states that if an online school is on performance watch and changes authorizers, either in its original form or as a successor school, or if the online school is created as a successor school with the same authorizer, the online school remains on performance watch. If an online school is closed because of actions taken as a result of accountability, the online school must apply for a new certification before it can operate again either as the original online school or as a successor school, regardless of whether the online school changes authorizers.
