The bill modifies procurement requirements for state contracts for public projects. The bill makes the following changes:

solicited by invitation for bids.

**Competitive sealed best value bids:** Currently, all construction contracts for public projects that do not receive federal money may be awarded by competitive sealed best value bidding. The bill specifies that, unless prohibited by federal law, a construction contract for a public project that is reasonably expected to cost over \$1 million is required to be awarded through competitive sealed best value bidding or integrated project delivery, and a construction contract for a public project that is reasonably expected to cost \$1 million or less may be awarded through competitive sealed best value bidding or integrated project delivery.

Current law specifies the evaluation factors that are required to be included in an invitation for competitive sealed best value bids for a public project. The bill adds several required evaluation factors including the craft labor staffing plan for the project for the bidder and the bidder's subcontractors, the anticipated utilization by the bidder and its subcontractors of apprentices registered with federal or state apprenticeship agencies to complete the work under the contract, and the safety plan and safety record of the bidder and the bidder's subcontractors.

**Disclosure of subcontractors:** The bill requires any contractor that responds to a competitive solicitation for a public project to disclose, in its initial bid or proposal, the top 5 subcontractor disciplines it plans to use to fulfill the requirements of the contract. The bill specifies how the top 5 subcontractor disciplines are measured and requires contractors to disclose subcontractors for the mechanical, electrical, and plumbing requirements of the contract, even if they are not included in the top 5 disciplines.

**Apprenticeship utilization requirements:** The general contractor for a public project financed in whole or in part by state money in the amount of \$1 million or more is required to submit, prior to the contract award, documentation to the contracting agency that certifies that all subcontractors used on the project participate in apprenticeship training programs that have been approved by a federal or state apprenticeship agency and have a proven record of graduating apprentices for at least 3 of the past 5 years. The contractor is required to provide specified supporting documentation to the contracting agency and the agency is required to make the documentation available to the public on its website. A contractor that plans to submit a bid for a public project may request a waiver of the apprenticeship requirements and the contracting agency is required make public all waivers and the specific rationale for granting the waiver.

**Integrated project delivery:** Current law specifies that integrated project delivery is a project delivery method in which there is a contractual agreement between an agency and a single participating entity for the design, construction, alteration, operation, repair, improvement, demolition, maintenance, or financing, or any combination of these

services, for a public project. The bill adds additional evaluation factors that a contracting agency is required to use to evaluate proposals and the capabilities of participating entities. The additional factors include information about past performance and experience of the bidder, the bidder's project management plan for the contract, the bidder's staffing plan, the bidder's safety plan and safety record, the bidder's job standards, and the availability and use of domestically produced iron, steel, and related manufactured goods to execute the contract.
