HB 19-1123

**FINAL
FISCAL NOTE**

Drafting Number:	LLS 19-0615	Date:	May 14, 2019
Prime Sponsors:	Rep. Larson Sen. Smallwood	Bill Status:	Postponed Indefinitely
		Fiscal Analyst:	Greg Sobetski 303-866-4105 Greg.Sobetski@state.co.us

Bill Topic: INCOME TAX DEDUCTION FOR 529 ACCOUNT K-12 EXPENSES

Summary of Fiscal Impact:

<input checked="" type="checkbox"/> State Revenue	<input type="checkbox"/> TABOR Refund
<input checked="" type="checkbox"/> State Expenditure	<input type="checkbox"/> Local Government
<input type="checkbox"/> State Transfer	<input type="checkbox"/> Statutory Public Entity

This bill modifies the state income tax deduction for 529 account contributions, eliminating the income tax recapture requirement if moneys are withdrawn from a 529 account for K-12 education purposes. It decreases state revenue and decreases state expenditures on an ongoing basis.

Appropriation Summary: No appropriation is required.

Fiscal Note Status: This fiscal note reflects the introduced bill. This bill was not enacted into law; therefore, the impacts identified in this analysis do not take effect.

**Omits fiscal impacts affecting private 529 college savings accounts managed by CollegeInvest, a state enterprise.*

Summary of Legislation

This bill modifies the state income tax deduction for contributions to an education savings account established under section 529 of the Internal Revenue Code (529 account). The bill allows money in a 529 account to be withdrawn to pay for qualified kindergarten through twelfth grade (K-12) education expenses, including those for enrollment or attendance at a public, private, or religious school, and requires that such withdrawals not be subject to state income tax recapture.

Background

Current state deduction. Current state law allows a taxpayer annually to deduct 529 account contributions when computing their state taxable income. Taxpayers are allowed to spend money from 529 accounts for "qualified higher education expenses," as defined under a particular section in federal law, or as a result of the beneficiary student's death or disability or receipt of a scholarship. Disbursements that do not fit one of these purposes are subject to income tax recapture, meaning that taxpayers must pay income tax on the amount disbursed, plus penalty and interest. Colorado 529 accounts are managed by CollegenInvest, a state enterprise administered through the Department of Higher Education.

Federal deduction. Federal law allows for investment income earned in a 529 account to be deducted for federal tax purposes.

Tax Cuts and Jobs Act. The Tax Cuts and Jobs Act (TCJA) became law in December 2017. It amends section 529 to broaden the types of expenses that qualify for the federal deduction. Specifically, the TCJA permits expenses up to \$10,000 per beneficiary per year for an elementary or secondary public, private, or religious school; for tuition for tutoring or educational classes outside the home; for dual enrollment with a higher education institution; and for educational therapies for students with disabilities in connection with a home school.

According to an Office of Legislative Legal Services (OLLS) legal memorandum dated February 27, 2018, 529 account contributions for K-12 expenses and for other expenses added in the TCJA are eligible for the state deduction; however, 529 account withdrawals for these purposes are subject to income tax recapture, including penalty and interest. Expenditures for additional income tax recapture associated with this provision of the TCJA are not included in the 2019 Long Bill.

Assumptions

Current law. This fiscal note assumes that current law will be administered in a manner consistent with the February 27, 2018, OLLS memorandum. Accordingly, 529 account contributions for K-12 expenses are assumed to qualify for the state deduction. However, taxpayers making 529 account withdrawals for these purposes are assumed to be subject to income tax recapture, including penalty and interest. Expenditures required for the DOR to administer this obligation in future years have not been estimated and are currently assessed as indeterminate.

House Bill 19-1123. Taxpayers who pay tuition at a private K-12 school are assumed to have an incentive to deposit their tuition payments up to \$10,000 annually in a 529 account, even if these contributions will not remain in the account long enough to accrue substantial interest. For example, a taxpayer who pays K-12 tuition of \$10,000 will receive a tax benefit worth \$463 by depositing income of \$10,000 in a 529 account, even if this money accrues no interest. For this reason, this bill is assumed to incentivize taxpayers to use 529 accounts even if they receive no federal tax benefit. Further, because tax benefits can be accessed during the same year for which qualified expenses are paid, this fiscal note assumes no lag time between 529 account deposits and withdrawals.

State Revenue

The bill is expected to decrease General Fund revenue by \$3.1 million in FY 2019-20 and by \$3.4 million in FY 2020-21 and subsequent fiscal years. The estimate for FY 2019-20 reflects the bill's August 2, 2019, effective date. The bill reduces individual income tax revenue, which is subject to TABOR; however, the state is not expected to collect a TABOR surplus in FY 2019-20 or FY 2020-21.

General Fund. The bill reduces income tax revenue by eliminating a current law income tax recapture requirement for 529 account withdrawals for K-12 education, and by providing an income tax benefit to taxpayers who make 529 account contributions that they intend to withdraw for K-12 education purposes. This bill assumes that accounts will be utilized for approximately 11,000 K-12 students per year, for whom 529 account contributions will be made in amounts averaging \$6,650 annually. The population estimate assumes that accounts will be used for 31.5 percent of Colorado's 34,550 private school students, consistent with the share of college students for whom accounts are used. The estimated amount deducted is consistent with account disbursements for higher education.

529 accounts. Table 1 does not present the bill's impact on revenue collected in 529 accounts because this revenue is not available for appropriation or expenditure by any state agency. Consistent with the General Fund revenue estimates in the previous paragraph, the bill is expected to increase funds contributed to 529 accounts by \$73.2 million annually when fully implemented.

State Expenditures

The bill decreases General Fund expenditures for tax administration because DOR will no longer be required to initiate income tax recapture when withdrawals from 529 accounts are made for K-12 education purposes. The impact on expenditures will occur in future years on an ongoing basis and is assessed as indeterminate.

529 accounts. Table 1 does not present the bill's impact on expenditures paid from 529 accounts because these expenditures are not made for any state program. Consistent with the General Fund revenue estimates in the previous section, the bill is expected to increase withdrawals from 529 accounts by \$73.2 million annually when fully implemented.

Effective Date

The bill was postponed indefinitely by the House Education Committee on February 19, 2019.
