Bill Summary

(Note: This summary applies to this bill as introduced and does not reflect any amendments that may be subsequently adopted. If this bill passes third reading in the house of introduction, a bill summary that applies to the reengrossed version of this bill will be available at http://leg.colorado.gov.)
From money given to the state pursuant to the federal "Coronavirus Aid, Relief, and Economic Security Act", commonly referred to as the "CARES Act", the bill allocates $10 million from the care subfund in the general fund to the energy outreach Colorado low-income energy assistance fund administered by the Colorado energy office for use by energy outreach Colorado on or before December 30, 2020, to provide direct utility bill payment assistance to households facing economic hardship due to the COVID-19 pandemic.

Be it enacted by the General Assembly of the State of Colorado:

SECTION 1. Legislative declaration. (1) The general assembly hereby finds and determines that:

(a) In response to the COVID-19 pandemic that spread to many states, including Colorado, in February of 2020, Congress enacted the "Coronavirus Aid, Relief, and Economic Security Act", Pub.L. 116-136, also referred to as the "CARES Act", to provide emergency assistance to state, local, and tribal governments;

(b) The CARES Act established the Coronavirus Relief Fund (CRF) and appropriated $150 billion to the CRF for distribution, in part, to the states to cover costs that:

(I) Are necessary expenditures incurred due to the public health emergency with respect to the COVID-19 pandemic;

(II) Were not accounted for in the budget most recently approved as of March 27, 2020, for the state; and

(III) Were incurred during the period that begins on March 1, 2020, and ends on December 30, 2020;

(c) Approximately $1.674 billion was transferred from the CRF to Colorado's state government and, in his executive order D 2020 070, dated May 18, 2020, the governor transferred $70 million of that money
to the general fund for disbursement by the general assembly;

(d) The United States department of the treasury has issued guidance on states' use of money allocated from the CRF, including the "Coronavirus Relief Fund Frequently Asked Questions" document issued on May 4, 2020, and updated on May 28, 2020, in which the department indicated that "fund payments may be used for subsidy payments to electricity account holders to the extent that the subsidy payments are deemed by the recipient to be necessary expenditures incurred due to the COVID-19 public health emergency ... [and,] if determined to be a necessary expenditure, a government could provide grants to individuals facing economic hardship to allow them to pay their utility fees and thereby continue to receive essential services";

(e) To help reduce the spread of COVID-19, residents throughout the state have remained in their homes to comply with stay-at-home and safer-at-home orders, which compliance has led to increased household use of electric, heating, and cooling utilities and resulted in increased residential utility bills;

(f) Compounding the problem is the fact that the COVID-19 pandemic has led to extensive job losses throughout the state, where more than 450,000 claims for state and federal unemployment assistance have been filed since March 1, 2020, and many Coloradans have experienced a significant decline in their household incomes;

(g) While some utilities have implemented a moratorium on utility disconnections, the moratoriums do not address the difficulty that a household that is facing economic hardship as a result of the COVID-19 pandemic will have paying its utility bill once a utility's disconnection moratorium is lifted;
(h) Utility disconnections will provide further economic and health risks to Colorado residents because utility disconnections:

(I) Create unsafe housing conditions;

(II) Increase the likelihood of eviction for certain renters; and

(III) In light of the need for people to remain at home as much as possible, increase the risks of lost wages and reduced educational opportunities arising from a lack of electricity;

(i) Assisting low-income households throughout the state with their utility bill payments would help mitigate the economic and health risks caused by the COVID-19 pandemic; and

(j) Expanding the state's existing utility bill payment assistance program to provide direct utility bill payment assistance to those households facing economic hardship caused by the COVID-19 pandemic, which assistance was not accounted for in the state's budget most recently approved as of March 27, 2020, is a necessary expenditure.
