SENATE BILL 21-158

A BILL FOR AN ACT

CONCERNING MODIFICATIONS TO THE COLORADO HEALTH SERVICE CORPS PROGRAM ADMINISTERED BY THE DEPARTMENT OF PUBLIC HEALTH AND ENVIRONMENT TO EXPAND THE AVAILABILITY OF GERIATRIC CARE PROVIDERS IN SHORTAGE AREAS IN THE STATE, AND, IN CONNECTION THEREWITH, MAKING AN APPROPRIATION.

Bill Summary

(Note: This summary applies to this bill as introduced and does not reflect any amendments that may be subsequently adopted. If this bill passes third reading in the house of introduction, a bill summary that applies to the reengrossed version of this bill will be available at http://leg.colorado.gov.)

The bill modifies the Colorado health service corps program...
administered by the primary care office (office) in the department of public health and environment, which program includes a loan repayment program, as follows:

- Allows geriatric advanced practice providers, which include advanced practice registered nurses and physician assistants with geriatric training or experience, to participate in the loan repayment program on the condition of committing to provide geriatric care to older adults in health professional shortage areas for a specified period; and
- Requires the general assembly to annually and continuously appropriate money from the general fund to the office for the 2021-22 through the 2025-26 fiscal years to help repay loans for geriatric advanced practice providers.

_________

Be it enacted by the General Assembly of the State of Colorado:

SECTION 1. Legislative declaration. (1) The general assembly finds and determines that:

(a) Colorado currently has approximately 840,000 residents over 65 years of age, and that number is expected to grow to 1.2 million by 2030, a 43% increase in that population in 10 years;

(b) Additionally, the statewide population of residents over 75 years of age is approximately 327,000 and is expected to grow to 559,000 by 2030, a nearly 71% increase in that population in 10 years;

(c) Colorado is estimated to have 125,000 residents afflicted with dementia by 2030, including an estimated 25,000 residing in rural areas of the state;

(d) Geriatric specialists, including advanced practice providers with geriatric training or experience, provide a patient-centered, holistic approach to care and are highly trained to care for patients with dementia and their families;

(e) Each geriatric specialist is typically able to care for
approximately 700 patients in an urban setting and fewer patients in a rural setting;

(f) Currently, the number of Colorado health-care providers with training in geriatrics is far short of the number of providers needed, and the number is expected to be drastically short of the 2030 projected need for geriatric-trained health-care providers;

(g) Advanced practice providers, including advanced practice registered nurses and physician assistants, who have additional training or experience in geriatrics, are critical to address the shortage in geriatric specialists and to provide the level of care required for the state's growing aging population;

(h) According to reliable sources such as the Colorado department of public health and environment's 2015 report, *Healthy Aging in Colorado*, rural areas of the state are woefully ill-equipped to support aging populations, with rural counties in the southern and eastern parts of the state bearing a higher proportion of the burden of inadequate resources;

(i) Nearly 50% of Coloradans 75 years of age or older live in rural areas of the state, yet only about 10% of geriatric specialists reside in or serve rural areas;

(j) In America, 24% of veterans live in rural areas, and those veterans are significantly older than veterans living in urban areas, are likely to have complex care needs and multiple chronic conditions, and have far less access to geriatric care than their urban counterparts;

(k) Older adults who are healthy or have minimal health issues are inclined to live at home and age in place rather than in a nursing home or other group living situation, and medical experts advise that people age
better at home;

(l) Older adults who are able to live at home instead of in a group setting are less susceptible to the spread of disease, such as COVID-19, thus prolonging their lives and avoiding lengthy hospital stays; and

(m) It is critical for the state to take specific, targeted action to increase the number of geriatric specialists providing geriatric care to the growing older adult populations in rural and other provider shortage areas of the state by allowing geriatric advanced practice providers to participate in the state's loan repayment program through which providers who commit to providing care in shortage areas of the state for specified periods receive education loan repayment assistance.

SECTION 2. In Colorado Revised Statutes, 25-1.5-501, amend (1) and (2) as follows:

25-1.5-501. Legislative declaration. (1) The general assembly hereby finds that there are areas of Colorado that suffer from a lack of health-care professionals, GERIATRIC ADVANCED PRACTICE PROVIDERS, or behavioral health-care providers to serve, and a lack of nursing or other health-care professional faculty to train health-care professionals to meet, the medical and behavioral health-care needs of communities. The general assembly further finds that the state needs to implement incentives to encourage health-care professionals, GERIATRIC ADVANCED PRACTICE PROVIDERS, and behavioral health-care providers to practice in these underserved areas and to encourage nursing faculty and other health-care professional faculty to teach health-care professionals.

(2) It is therefore the intent of the general assembly in enacting this part 5 to create a state health service corps program that uses state money, federal money, when permissible, and contributions from
communities and private sources to help repay the outstanding education loans that many health-care professionals, GERIATRIC ADVANCED PRACTICE PROVIDERS, behavioral health-care providers, candidates for licensure, nursing faculty, and health-care professional faculty hold. In exchange for repayment of loans incurred for the purpose of obtaining education in their chosen health care, GERIATRIC CARE, and behavioral health-care professions, the health-care professionals, GERIATRIC ADVANCED PRACTICE PROVIDERS, behavioral health-care providers, and candidates for licensure will commit to provide health care, GERIATRIC CARE, or behavioral health-care services, as applicable, in communities with underserved health care, GERIATRIC CARE, or behavioral health-care needs throughout the state, and the nursing and health-care professional faculty will commit to provide a specified period of service in a qualified faculty position.
