functional health-care specialist from providing medically necessary services to a student during school hours.

The bill authorizes an administrative unit to utilize onsite therapists when selecting a functional health-care specialist to provide the medically necessary services to the student. If the administrative unit does not have an appropriate specialist available on site, the bill requires the administrative unit to allow a community-based specialist to provide the medically necessary services in the school setting. The administrative unit is also required to consider selecting specialists who provide frequent and regular therapy to the student outside of the school setting to provide the medically necessary service to the student in the school setting in order to maintain continuity of care.

The bill does not increase, alter, or reduce an administrative unit's obligation to provide required services pursuant to the federal "Individuals with Disabilities Education Act" or section 504 of the federal "Rehabilitation Act of 1974".

1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Legislative declaration.** (1) The general assembly
3 finds and declares that:

4 (a) Colorado has a strong recent history of passing legislation that
5 has significantly improved access to medically necessary behavioral
6 health treatments for children, resulting in great strides in service access
7 across many settings. Unfortunately, access to medically necessary
8 services in the school setting has lagged.

9 (b) Applied behavioral analysis (ABA) is one critical example of
10 a medically necessary service that, when prescribed by a physician or
11 other qualified health-care provider, may need to be delivered within a
12 school setting for children with an autism spectrum disorder (ASD)
13 diagnosis. ASD is a global developmental disorder typically involving
14 difficulty in acquiring and generalizing functional skills across
15 environments. Generally accepted standards of care for this population
16 require that ABA therapy is provided across settings, including schools,

1 in accordance with a child's clinical needs. It is in the interest of the child,
2 the child's family, and the state that a child who is diagnosed with ASD
3 receive proper care and treatment in order to have the opportunity to be
4 a fully functioning individual in society.

5 (c) The Colorado health insurance mandate to cover ASD requires
6 state-regulated health insurance plans to cover all specified medically
7 necessary treatment for ASD, including treatment in school settings;

8 (d) Pursuant to 42 U.S.C. sec. 1396 and sec. 1396d (r)(5),
9 Colorado's medicaid program is required to cover all medically necessary
10 treatment, whether or not included in the current medicaid state plan, to
11 correct or ameliorate defects, illnesses, or conditions in medicaid-eligible
12 children under twenty-one years of age, including treatment in school
13 settings;

14 (e) The lack of access to medically necessary services in schools
15 has detrimental effects on the children who are unable to achieve
16 maximum long-term functioning, as well as significant social costs,
17 including lost productivity and increased costs of care. Over the course
18 of a child's lifetime, inadequate access to treatment during the child's
19 school-aged years may result in millions of dollars of therapies and
20 supports needed later in life, as well as lost economic and employment
21 opportunities over time.

22 (f) While schools provide special education and related services,
23 many children have unmet medical needs in their school setting. These
24 needs can be met by allowing access to services funded by third parties.
25 Funding for medically necessary services for these children is appropriate
26 and available through medicaid's early and periodic screening, diagnostic,
27 and treatment program or through a family's private health insurance plan,

1 thereby placing no greater financial burden on the state's public schools.

2 (g) Currently, access to medically necessary services in the school
3 setting is too often restricted, causing damage to Colorado children and
4 the state, which bears the cost when medically necessary services are not
5 provided. No family should have to choose between a child attending
6 public school or receiving access to medically necessary services.
7 Ensuring that children have access to these services will also improve the
8 efficacy of their treatment and their integration into the community, as
9 well as reduce long-term costs to the state.

10 **SECTION 2.** In Colorado Revised Statutes, **add 22-20-121** as
11 follows:
