success. The student success measures must include postsecondary success measures and workforce success measures.

The bill requires the department to create and maintain a statewide student success data system that includes institution-specific interfaces and a public interface. The data system includes student success information aligned with the student success measures. An institution interface includes student success data that is more timely, more granular, appears in a different format, or includes functionality that is different from information provided on the public interface. The public interface must allow a user to view and compare student workforce success information for specific institutions of higher education in Colorado. The commission determines the information included in the public interface and how that information is disaggregated by various student populations, such as populations identified by race, ethnicity, gender, and socioeconomic factors. The bill requires the commission to use the data included in the institution and statewide data system to examine educational and workforce success disparities among various student populations.

The department may enter into an agreement with a third party to create and maintain the data system. The bill requires the department to update and modernize its data collection systems to facilitate the collection of student success data. The bill requires the general assembly to appropriate \$3 million to create the data system.

1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Legislative declaration.** (1) The general assembly
3 finds and declares that:

4 (a) The COVID-19 pandemic created economic disruption across
5 almost every industry, posing significant challenges to students pursuing
6 postsecondary education in preparation to enter the job market and build
7 their careers;

8 (b) With the infusion of one-time federal funds, Colorado has a
9 unique opportunity to drive improvements in the education-to-career
10 pipeline and put higher education and workforce development at the
11 center of the economic recovery agenda;

12 (c) By using these funds to address near-term needs, Colorado can

1 invest in structural solutions and make progress on a long-term vision for
2 postsecondary success;

3 (d) Information about higher education in Colorado is limited for
4 the public and consumers, including students and the people who may
5 employ them;

6 (e) Improving statewide education and workforce outcomes is
7 contingent upon data-informed decision-making made possible with
8 publicly accessible data;

9 (f) The task force created pursuant to House Bill 21-1330, enacted
10 in 2021, recommended investing in a statewide data system to enhance
11 public transparency of postsecondary and workforce data, with the
12 ultimate goal of maintaining a longitudinal framework to connect K-12,
13 postsecondary, and workforce data; and

14 (g) A data system will better equip faculty, staff, and leadership
15 at postsecondary institutions with granular, timely data to inform
16 decision-making; uncover equity gaps; increase student success; and
17 identify, communicate, and showcase promising practices.

18 (2) Therefore, the general assembly declares that the creation of
19 a statewide student success data system will provide institutions of higher
20 education with actionable metrics of student success and make available
21 robust economic opportunity data to empower students as they navigate
22 all available education and training options.

23 **SECTION 2.** In Colorado Revised Statutes, **add** 23-1-139 as
