residences, businesses, schools, government buildings, and public places. The program is funded by annual dues (producer responsibility dues) paid by producers of products that use covered materials (producers). Covered materials are defined as packaging materials and paper products that are sold, offered for sale, or distributed in the state.

The bill creates the producer responsibility program for statewide recycling advisory board (advisory board) that consists of members who have expertise in recycling programs and are knowledgeable about recycling services in the different geographic regions of the state.

Prior to the implementation of the program, the organization must:

- On or before September 1, 2023, hire an independent third party to conduct an assessment of the recycling services currently provided in the state and the recycling needs in the state that are not being met (needs assessment);
- On or before April 1, 2024, report the results of the needs assessment to the advisory board and the executive director; and
- On or before February 1, 2025, after soliciting input from the advisory board and other key stakeholders, submit a plan proposal for the program (plan proposal) to the advisory board and executive director.

The plan proposal will initially cover recycling services only for residential covered entities. The plan proposal must:

- Describe how the organization will meet certain convenience standards and statewide recycling, collection, and postconsumer-recycled-content rates (rates);
- Establish a funding mechanism through the collection of producer responsibility dues that covers the organization's costs in implementing the program and the costs of the department in overseeing the program;
- Establish an objective formula to reimburse 100% of the net recycling services costs of public and private recycling service providers (providers) performing services under the program;
- Provide a list of covered materials (minimum recyclable list) that providers performing services under the program must collect to be eligible for reimbursement under the program;
- Set minimum rate targets that the state will strive to meet by January 1, 2030, and January 1, 2035, and describe how the state can meet increased rates after 2035; and
- Describe a process and timeline, beginning no later than 2028, to expand recycling services to applicable nonresidential covered entities.

As part of the program, the organization must:
