# An Act

SENATE BILL 22-151

BY SENATOR(S) Danielson and Story, Bridges, Buckner, Donovan, Fields, Ginal, Hansen, Jaquez Lewis, Kolker, Lee, Liston, Moreno, Pettersen, Priola, Rankin, Rodriguez, Winter, Fenberg;  
also REPRESENTATIVE(S) McCluskie and Will, Roberts, Amabile, Bennett, Bird, Boesenecker, Caraveo, Cutter, Esgar, Exum, Froelich, Gonzales-Gutierrez, Hooton, Jodeh, Kipp, Lindsay, Lontine, McCormick, McLachlan, Mullica, Ricks, Snyder, Titone, Valdez A., Valdez D., Woodrow, Young.

CONCERNING THE CREATION OF A CASH FUND FOR USE BY THE DEPARTMENT OF TRANSPORTATION TO FUND PROJECTS THAT PROVIDE SAFE ROAD CROSSINGS FOR CONNECTIVITY OF WILDLIFE AND THEREBY REDUCE WILDLIFE-VEHICLE COLLISIONS.

*Be it enacted by the General Assembly of the State of Colorado:*

**SECTION 1. Legislative declaration.** (1) The general assembly hereby finds and declares that:

(a) In Colorado, the department maintains over 23,000 miles of highway, and daily seasonal movements of wildlife create a conflict that results in nearly 4,000 vehicle crashes involving wildlife being reported to

law enforcement every year. These crashes result in injuries and fatalities to humans and an estimated \$80 million annually in property damage, emergency response, and medical treatment. This figure does not include the value of wildlife killed in vehicular collisions, the impact on the health of wildlife populations, or the loss and fragmentation of the vibrant habitats wildlife call home.

(b) Colorado boasts the largest rocky mountain elk herd in the world and is also home to significant populations of other iconic big game species such as mule deer, bighorn sheep, pronghorn, and moose, as well as numerous other endemic wildlife species.

(c) Intact habitats and intact wildlife corridors that connect the habitats are vital to ensuring that Colorado's wildlife populations continue to thrive. Protecting wildlife corridors has been shown to improve the herd vitality of big game species that are critical to Colorado's outdoor recreation economy.

(d) Each year, the department's maintenance crews report moving an average of 5,900 animals off the roadway. It is estimated that 2% of Colorado's deer population is killed by wildlife-vehicle collisions every year, equal to the total number of animals harvested each year through hunting, without the economic and social benefits that hunting provides.

(e) Wildlife crossing structures built within important wildlife corridors increase public safety and are highly effective at reducing wildlife-vehicle collisions and the costs associated with those collisions. For example, the 2016 Colorado Highway 9 mitigation project reduced wildlife-vehicle collisions by 92% in the 5 years after its construction.

(f) There are currently 64 successful wildlife crossing projects across Colorado, but the state, through the governor's office, the department, the department of natural resources, and other entities, has identified many more priority areas in need of mitigation measures that lack the necessary funding to advance through design and construction.

(g) Federal legislation to increase funding available for wildlife-vehicle collision mitigation and to protect wildlife corridors has been signed by the president of the United States, and such legislation will contribute significant resources and competitive grants to highway safety

projects and provide a source of funding to the state to protect wildlife corridors and pursue highway mitigation projects.

(h) Protecting wildlife habitats and wildlife corridors requires significant financial investments, and the effectiveness and cost-efficiency of all of the existing efforts in the state will be enhanced by a comprehensive and coordinated effort through funding for department projects. The Colorado wildlife safe passages fund created in the act will proactively prepare the department to take advantage of maximal federal funding opportunities in the coming months and years.
