an institution of higher education (institution) is authorized to establish and operate a health-care professionals rural track within any health-care professional education program offered by the institution.

A rural track must set aside seats in its health-care professional education program for students who express an interest in studying and working in a rural or frontier county, offer didactic curriculum related to practicing the health-care discipline in rural or frontier counties, place students in rural or frontier counties for hands-on instruction and training, and award scholarships to students in the rural track. In order to receive a scholarship, a student must commit to working as a health-care professional in a rural or frontier county for 2 years after completing education and training.

The rural office at the university of Colorado's school of medicine (rural program office) provides technical assistance to the institutions operating a rural track regarding recruiting and admitting students committed to working in rural areas and identifying rural or frontier counties in which students may be placed for clinical training. The rural program office also facilitates, arranges, or advises an institution about arranging housing for students placed in a rural or frontier county. The rural program office must provide, without charge, to institutions operating a rural track, didactic curriculum related to practicing in rural or frontier counties. The bill requires the rural program office to annually evaluate the effectiveness of the initiative and report to the general assembly's education committees about the initiative.

The bill requires the general assembly to annually appropriate \$150,000 to the rural program office to support institutions that operate a rural track. For state fiscal year 2022-23, the general assembly is required to appropriate up to \$400,000 to certain institutions to establish or expand rural tracks in 12 programs specified in the bill.

1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Legislative declaration.** (1) The general assembly
3 finds and declares that:

4 (a) Nearly three-quarters of Colorado's sixty-four counties are
5 designated as rural or frontier counties by the state office of rural health;

6 (b) Rural and frontier counties have difficulty recruiting and
7 retaining health-care workers;

8 (c) The ongoing COVID-19 pandemic that decimated the

1 health-care workforce across Colorado hit rural areas especially hard, and
2 the associated burnout is causing health-care workers to leave medicine
3 and nursing;

4 (d) The university of Colorado (CU) school of medicine's rural
5 office at the Anschutz medical campus provides a model program for
6 educating health-care professionals that wish to live and work in rural
7 areas. Other institutions that educate health-care professionals can take
8 advantage of the expertise, experience, and infrastructure in place at the
9 CU school of medicine's rural office in order to prepare their health-care
10 students to work in rural or frontier counties.

11 (e) Establishing and funding a limited number of health-care
12 professional rural track programs allows the general assembly to collect
13 data and information on best practices for providing
14 rural-practice-focused education to health-care professionals; and

15 (f) The general assembly can use the lessons learned to later
16 expand the new Colorado rural health-care workforce initiative to other
17 institutions and practice areas to increase the number of health-care
18 professionals practicing in Colorado's rural and frontier counties.
