The bill allows health care providers to prescribe and dispense FDA-approved therapeutic drugs currently accepted for uses other than prevention or treatment of COVID-19, to prevent or treat COVID-19. This bill will increase state workload in FY 2022-23.

Appropriation Summary: No appropriation is required.

Fiscal Note Status: The fiscal note reflects the introduced bill.

Summary of Legislation

The bill allows health care providers to prescribe and dispense FDA-approved therapeutic drugs currently accepted for uses other than prevention or treatment of COVID-19, to prevent or treat COVID-19. The bill specifies that these drugs include hydroxychloroquine sulfate and ivermectin. The authorization applies to prescribers including physicians, physician assistants, and advanced practice nurses, as well as pharmacists. The bill clarifies that prescribing or dispensing drugs in this manner does not constitute unprofessional conduct, and that a regulator will not initiate an investigation, inquiry or other corrective action for this conduct.

State Expenditures

For FY 2022-23, this bill is anticipated to minimally increase workload in the Division of Professions and Occupations in the Department of Regulatory Agencies to update rules, and to conduct outreach and education to health care providers. The fiscal note assumes that this increased workload can be accomplished within existing resources and no change in appropriations is required.

Effective Date

The bill takes effect upon signature of the Governor, or upon becoming law without his signature.
