**Points to Consider***General Fund Impact*

The Joint Budget Committee has proposed a budget package for FY 2022-23 based on the March 2022 Legislative Council Staff revenue forecast. The budget package includes two set-asides:

- \$40.0 million General Fund for bills that create ongoing obligations; and
- \$900.0 million General Fund for bills that create one-time obligations in FY 2022-23.

The \$40.0 million *appropriations* set-aside includes an additional \$6.0 million General Fund to provide a 15.0 percent General Fund reserve for those appropriations. The \$900.0 million *obligations* set-aside does not include an additional amount for a General Fund reserve and, assumes, but does not require, that obligations be addressed through statutory transfers rather than appropriations. Therefore *appropriations* from the \$900.0 million set-aside require an additional 15.0 percent to maintain the statutory General Fund reserve.

This bill creates a one-time obligation and includes a General Fund transfer of \$20.0 million for FY 2022-23, reducing the \$900.0 million set aside by the same amount.

*Legislative Appropriation Authority*

Continuous spending authority, also known as **continuous appropriations**, allows departments to spend money for statutorily specified purposes up to the amount of money in the fund without seeking annual legislative approval. An annual appropriation provides a limit on spending authority, while a continuous appropriation provides unlimited spending authority.

This method of funding moves these expenditures off-budget, and thus expenditures are not reported or accounted for through the budget process. Is it necessary for the Colorado Energy Office to **not** seek annual authority from the General Assembly to spend money from Geothermal Energy Grant Fund?
