CONCERNING CRISIS SERVICES INFORMATION ON STUDENT IDENTIFICATION CARDS.

*Be it enacted by the General Assembly of the State of Colorado:*

**SECTION 1. Legislative declaration.** (1) The general assembly finds and declares that:

(a) Young adulthood, which is commonly considered to be ages 19 to 24, is a time of often stressful transitions during which some major

mental health conditions first emerge. Young adults with untreated or undiagnosed behavioral health problems often face academic and personal problems and sometimes drop out of school. This age group also has a significantly higher rate of suicide compared to youth ages 10 to 18. The Colorado department of public health and environment reports that between 2003 and 2017 there were 1,290 suicides among young adults ages 19 to 24 and 696 suicides among youth ages 10 to 18.

(b) Providing access to mental health care is one way to prevent suicide. The American Foundation for Suicide Prevention reports in a 2022 policy paper on suicide on university and college campuses that only half of enrolled students said they knew where to find mental health services. This suggests that postsecondary institutions should make students more aware of suicide prevention resources and services.

(2) Therefore, it is the intent of the general assembly that this bill increase awareness of mental health resources, and the general assembly recognizes this awareness as an important step toward preventing suicide and promoting well-being among young adults.

**SECTION 2.** In Colorado Revised Statutes, **amend** 23-5-109 as follows:
