CONCERNING CREATING A BEHAVIORAL HEALTH FIRST AID TRAINING PROGRAM IN THE OFFICE OF SUICIDE PREVENTION, AND, IN CONNECTION THEREWITH, MAKING AN APPROPRIATION.

Be it enacted by the General Assembly of the State of Colorado:

SECTION 1. Legislative declaration. (1) The general assembly finds and declares that:

(a) Mental health challenges affect all age groups, races, ethnic groups, and socioeconomic classes;

(b) The most recent data from the Centers for Disease Control and Prevention shows that in 2018, Colorado had one of the 10 highest

age-adjusted suicide death rates in the nation with 21.9 deaths per 100,000 Coloradans;

(c) Calls and texts to the Colorado crisis line steadily increased during the COVID-19 pandemic;

(d) As of 2021, many Coloradans, including nearly one in 5 teens or youth, live with mental health challenges;

(e) Since the Children's Hospital Colorado declared a youth mental health state of emergency in 2021, Colorado's mental health crisis among teens and youth has not improved;

(f) According to the 2022 State of Mental Health in America Report, Colorado had one of the highest shares of adults with mental illness, with roughly one in 4 adults having a mental illness;

(g) Many more Coloradans are affected by the mental health challenges of someone else, such as a close friend, family member, or classmate;

(h) Mental health education increases awareness of mental health challenges, educates individuals on how to seek help, and reduces the stigma associated with mental health challenges;

(i) Mental health crisis statistics for teens and youth are alarming and constitute a call to action. According to the national statistics for teen mental health reported by the Centers for Disease Control and Prevention, in 2021:

(I) Suicide was the third leading cause of death among teens and youth between 14 and 18 years of age;

(II) 22% of teens and youth seriously considered attempting suicide; 18% of teens and youth made a suicide plan; and 10% of teens and youth did attempt suicide; and

(III) 29% of teens and youth have experienced poor mental health.

(j) According to the Colorado Health Access Survey, the number of

Colorado teens and youth 18 years of age and younger who have reported having 8 or more days of poor mental health over the past 30 days has more than doubled in 6 years; and

(k) Between 2016 and 2021, emergency room visits for mental health reasons have increased for teens and youth by 140%. Visits for self-harm have more than tripled.

(2) The general assembly finds, therefore, that it is necessary for the state to expand its efforts to improve the mental health and well-being of all Coloradans by establishing and implementing the behavioral health first aid training program. The behavioral health first aid training program is a vital initiative to address the mental and behavioral health needs of Coloradans to foster supportive environments within Colorado communities.
