1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Legislative declaration.** (1) The general assembly
3 finds and declares that:

4 (a) Mental health challenges affect all age groups, races, ethnic
5 groups, and socioeconomic classes;

6 (b) The most recent data from the Centers for Disease Control and
7 Prevention shows that in 2018, Colorado had one of the 10 highest
8 age-adjusted suicide death rates in the nation with 21.9 deaths per
9 100,000 Coloradans;

10 (c) Calls and texts to the Colorado crisis line steadily increased
11 during the COVID-19 pandemic;

12 (d) As of 2021, many Coloradans, including nearly one in 5 teens
13 or youth, live with mental health challenges;

14 (e) Since the Children's Hospital Colorado declared a youth
15 mental health state of emergency in 2021, Colorado's mental health crisis
16 among teens and youth has not improved;

17 (f) According to the 2022 State of Mental Health in America
18 Report, Colorado had one of the highest shares of adults with mental
19 illness, with roughly one in 4 adults having a mental illness;

20 (g) Many more Coloradans are affected by the mental health
21 challenges of someone else, such as a close friend, family member, or
22 classmate;

23 (h) Mental health education increases awareness of mental health
24 challenges, educates individuals on how to seek help, and reduces the

1 stigma associated with mental health challenges;

2 (i) Mental health crisis statistics for teens and youth are alarming
3 and constitute a call to action. According to the national statistics for teen
4 mental health reported by the Centers for Disease Control and Prevention,
5 in 2021:

6 (I) Suicide was the third leading cause of death among teens and
7 youth between 14 and 18 years of age;

8 (II) 22% of teens and youth seriously considered attempting
9 suicide; 18% of teens and youth made a suicide plan; and 10% of teens
10 and youth did attempt suicide; and

11 (III) 29% of teens and youth have experienced poor mental health.

12 (j) According to the Colorado Health Access Survey, the number
13 of Colorado teens and youth 18 years of age and younger who have
14 reported having 8 or more days of poor mental health over the past 30
15 days has more than doubled in 6 years; and

16 (k) Between 2016 and 2021, emergency room visits for mental
17 health reasons have increased for teens and youth by 140%. Visits for
18 self-harm have more than tripled.

19 (2) The general assembly finds, therefore, that it is necessary for
20 the state to expand its efforts to improve the mental health and well-being
21 of all Coloradans by establishing and implementing the behavioral health
22 first aid training program. The behavioral health first aid training program
23 is a vital initiative to address the mental and behavioral health needs of
24 Coloradans to foster supportive environments within Colorado
25 communities.
