students through a contract with an external provider. The program emphasizes supporting schools in rural areas and schools with students who do not have equitable access to mental health care.

No later than January 1, 2025, the bill requires the BHA to contract with an external provider to implement the program no later than the start of the 2025-26 school year.

The bill requires the BHA to collaborate with the external provider to determine the cost of implementing the program in at least 400 public schools by the start of the 2027-28 school year.

The bill requires the general assembly to appropriate \$2.5 million from the general fund to the department of human services for use by the BHA to administer the program. The bill allows the BHA to use up to \$100,000 of the funds to select the external provider.

1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Legislative declaration.** (1) The general assembly  
3 finds and declares that:

4 (a) Young people are experiencing historic levels of mental  
5 distress, with suicide reported as the second leading cause of death among  
6 youth ages 10 to 24 in 2021, and there are consistently disproportionate  
7 rates of suicide among youth in rural areas, youth of color, and other  
8 underserved youth. In 2021, Colorado health-care practitioners also  
9 declared a state of emergency for youth mental health.

10 (b) Public schools are a natural congregation point and de facto  
11 provider of mental health services for many young people, but public  
12 schools are often under-resourced and under-equipped to provide  
13 high-quality, evidence-based mental health support;

14 (c) While hiring additional mental health practitioners is crucial,  
15 Colorado must also better utilize the expertise and relationships of the  
16 existing educator workforce currently providing mental health support to  
17 youth;

18 (d) Educators and school-based mental health professionals have

1 high rates of attrition because they often do not receive sufficient training  
2 and resources to provide suitable care to youth who need mental health  
3 support, and, as a result, public schools are often unable to provide  
4 adequate mental health support;

5 (e) With the implementation of the sixth through twelfth grade  
6 mental health screening program, public schools must be equipped with  
7 the appropriate resources to help youth who are in need of mental health  
8 support but who are either unable to access, or have exhausted, available  
9 resources and external support services and need additional school-based  
10 services;

11 (f) In order to better equip the existing public school workforce  
12 with evidence-based practices, increase educator efficacy, and reduce  
13 burnout, educators must be supported and trained in how to promote  
14 mental wellness for youth; provide cognitive behavioral skill-building and  
15 mindfulness skill-building for youth who demonstrate additional need for  
16 mental health support; provide resources to manage suicide risk; and  
17 coordinate care among families, schools, and external providers for youth  
18 who have suicidal ideation; and

19 (g) Colorado's rapidly growing youth mental health crisis impacts  
20 the state's health-care and education systems and therefore requires a  
21 state-funded public health response.

22 (2) (a) Therefore, the general assembly declares that assisting  
23 public schools in implementing and sustaining mental health multi-tiered  
24 systems of mental health support would greatly benefit Colorado youth.

25 (b) To assist public schools, the general assembly intends to scale  
26 a school-based mental health support program to 400 schools by the  
27 2027-28 school year.
