Bill Summary

(Note: This summary applies to this bill as introduced and does not reflect any amendments that may be subsequently adopted. If this bill passes third reading in the house of introduction, a bill summary that applies to the reengrossed version of this bill will be available at <http://leg.colorado.gov>.)

Shading denotes HOUSE amendment. Double underlining denotes SENATE amendment.
Capital letters or bold & italic numbers indicate new material to be added to existing law.
Dashes through the words or numbers indicate deletions from existing law.

Current law requires the department of higher education (department) and other higher education institutions to develop a framework for evaluating the quality of nondegree credentials. The bill formally recognizes the resulting quality and in-demand nondegree credentials framework (quality nondegree credentials framework) as the primary tool for assessing the quality of nondegree credentials offered in the state.

The bill requires the department to collaborate with various agencies to ensure the effective integration of the quality nondegree credentials framework within the state's education and workforce systems and to evaluate nondegree credentials offered through state-recognized programs to ensure the credentials meet the framework's quality standards. At least annually, the department shall supply a list of nondegree credential programs that meet the framework's quality standards for inclusion in the Colorado talent report and a credential registry endorsed by the state.

The department shall engage state agencies, educational institutions, international organizations, and other stakeholders to study and make recommendations about the adoption of the international standard classification of education (ISCED) as the state's standard framework for classifying nondegree credentials and ISCED's wider application in the state's education and workforce systems. The recommendations must include a process for assigning ISCED equivalency levels to nondegree credentials included in stackable credential pathways and apprenticeship programs. The bill requires the department to report its findings and recommendations on or before January 1, 2025.

Current law requires the department to create stackable credential pathways in growing industries. The bill requires the department to align the stackable credential pathways with appropriate ISCED equivalency levels on or before January 1, 2025.

The bill requires the office of future of work to coordinate with various agencies to determine ISCED equivalency levels for each apprenticeship program registered on and after January 1, 2025. The office of future of work shall then determine ISCED equivalency levels for each apprenticeship program registered before January 1, 2025.

1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Legislative declaration.** (1) The general assembly
3 finds and declares that:

4 (a) The strength and prosperity of Colorado's economy hinges on

1 economic mobility and educational opportunities for all Coloradans and
2 on the cultivation of a skilled workforce. According to the 2022 Colorado
3 talent pipeline report, 91.4 percent of tier one top jobs and 70.4 percent
4 of tier two top jobs in the state required some form of postsecondary
5 education beyond high school, including traditional academic degrees, as
6 well as industry certifications, badges, sub-baccalaureate certificates,
7 professional licenses, and apprenticeships.

8 (b) Traditional undergraduate and graduate degree programs are
9 the foundation of our postsecondary training system. However, they
10 cannot fully meet Colorado's evolving skilled workforce needs.
11 Nondegree credentials provide a valuable and complementary approach
12 to bridging the skills gap. They offer learners a practical and expedited
13 pathway to acquire the precise skills that employers urgently require to
14 meet their immediate workforce needs.

15 (c) In 2021, Credential Engine reported 967,734 unique secondary
16 and postsecondary education credentials in the United States. Existing
17 accreditation and regulation systems provide quality assurance for degree
18 programs but, with the exception of sub-baccalaureate certifications, do
19 not take a sufficiently holistic approach to quality assurance for
20 nondegree credentials. Existing systems fail to validate the legitimacy of
21 nondegree credentials, specify how they relate to degree programs, and
22 fail to indicate whether they develop in-demand skills that lead to good
23 jobs. This places a considerable burden on both learners and employers
24 who lack the time, expertise, and resources to verify the legitimacy and
25 quality of these credentials. As a result, employers and learners continue
26 to rely heavily on traditional degrees while quality nondegree credentials
27 remain underused and undervalued.

1 (d) To address this need, Colorado requires a system that brings
2 quality assurance, clarity, and order to the complex landscape of both
3 nondegree and traditional degree credentials by validating high-quality
4 credentials and indicating the level of training or skill mastery they
5 deliver; and

6 (e) With the help of a quality assurance framework and an
7 internationally recognized standard classification system, Colorado
8 employers can more easily assess candidate qualifications and skill
9 profiles and align their hiring practices and policies with proper
10 recognition of nondegree credentials. Knowing their chosen program
11 carries validation, legitimacy, and value in the labor market empowers
12 Colorado learners to make informed decisions about their careers.

13 (2) Therefore, the general assembly declares that the
14 implementation of a quality nondegree credentials framework and a
15 standard classification system is an essential step toward an equitable
16 economy, economic mobility, workforce development, and clarity in
17 educational and training attainment.
