## Summary of Legislation

This bill makes several changes to laws related to the emergency response for managing wildland fires. Notably, the bill:

- specifies the ability of all fire response agencies to transfer management of a wildland fire to the county sheriff when a fire exceeds the capability of a fire response agency to manage;
- repeals obsolete language requiring that emergency responses to wildfires adhere to a community wildfire protection plan, which is primarily a preventative planning document and not an emergency response tool;
- provides flexibility to the Division of Fire Prevention and Control in the Department of Public Safety to determine when to use a unified command management strategy; and
- repeals obsolete language referencing the division as the lead state agency for wildland fire response and suppression to align with the state emergency operations plan.

## Assessment of No Fiscal Impact

The bill makes technical changes, removes obsolete provisions, and generally aligns statute with current practice related to the emergency response to wildland fires, and the role of state and local emergency response agencies. The bill will not change the expenditures or revenue of any state agency, local government, or local emergency response agency. For these reasons, the bill is assessed as having no fiscal impact.

## Effective Date

The bill was signed into law by the Governor on April 4, 2024, and takes effect on August 7, 2024, assuming no referendum petition is filed.
