SUBJECT: Charge and Membership of the Statewide Health Care Review Committee

Summary

This memorandum provides an overview of the 2019 membership of the Statewide Health Care Review Committee, historical background on similar health care review committees, the origin and charge of the committee, and information regarding committee staff and the committee website.

Historical Background on Similar Health Care Review Committees

In 1998, the Executive Committee of the Legislative Council adopted a study resolution creating an interim committee to study emerging trends in Colorado health care and their impacts on consumers during the 1998 interim. The committee was directed to study a variety of issues, including: changes in relationships among health care providers, patients, and payors; restrictions in health care options and the availability of alternative methods of health care; the effect of managed care on timely, cost-effective quality care; and the costs and benefits of mandated health care coverages. In 1999, House Bill 99-1019 replaced the Joint Review Committee for the Medically Indigent, which had existed since 1983, with the Colorado Health Care Task Force. The task force was charged with studying 13 specific health-related issues over five years. The study charge included reviewing issues regarding emerging trends, managed care, and the operation of the medically indigent program. The task force repealed in 2004. In 2005, the Health Care Task Force was created by Senate Bill 05-227. The task force was charged with studying provider reimbursement issues, network adequacy, and other health care issues that affect health insurance in Colorado. The task force repealed in 2010.

Origin and Charge of the Committee

In 2019, the year-round Statewide Health Care Review Committee was created pursuant to Senate Bill 19-015. The committee is authorized to meet two times during each interim, unless additional meetings are authorized by the Executive Committee of the Legislative Council. Two of the meetings may be field trips.

The committee is charged with studying health care issues that affect Colorado residents throughout the state, including the following:

- emerging trends in Colorado health care and their effects on consumers, providers, and payers;
- the ability of consumers to obtain and keep adequate, affordable health insurance coverage;
- the effect of changes in the way health care is delivered and paid for;
- trends in health care coverage rates for individuals, employees, and employers and in reimbursement rates for health care services;
- access to and availability of federal funds and waivers of federal law;
- innovations in health care and health care coverage;
- health care issues that arise in or are unique to rural areas of the state;
- access to timely and quality health care and emergency and nonemergency medical transportation;
- options for addressing the needs of uninsured and underinsured populations;
- issues related to the health care workforce, including network adequacy and the adequacy of access to providers; and
- any other health care issue affecting Colorado residents that the committee deems necessary to study.

The committee cannot recommend legislation.
