Some studies have shown that there is no significant correlation between malpractice history and a [insert applicable type of health care provider]'s competence. At the same time, the [director or board of __________, as applicable] believes that consumers should have access to malpractice information. To make the best health care decisions, you should view this information in perspective. You could miss an opportunity for high quality care by selecting a health care provider based solely on malpractice history. When considering malpractice data, please keep in mind:

Malpractice histories tend to vary by profession and, as applicable, by specialty. Some professions or specialties are more likely than others to be the subject of litigation.

You should take into account how long the health care provider has been in practice when considering malpractice averages.

The incident causing the malpractice claim may have happened years before a malpractice action is finally resolved. Sometimes, it takes a long time for a malpractice lawsuit to move through the legal system.
Some health care providers work primarily with high-risk patients. These health care providers may have malpractice histories that are higher than average because they specialize in cases or patients who are at very high risk for problems. Settlement of a claim may occur for a variety of reasons that do not necessarily reflect negatively on the professional competence or conduct of the health care provider. A payment in settlement of a malpractice action or claim should not be construed as creating a presumption that malpractice has occurred.

You may wish to discuss information provided by the [director or board of , as applicable], and malpractice generally, with your health care provider.

The information posted on the [director's or board of 's, as applicable] website was provided by applicants for a license and applicants for renewal, reinstatement, or reactivation of a license.

(b) The imposition of an administrative fine pursuant to this subsection (9) shall not constitute a disciplinary action pursuant to the laws governing the applicant's, licensee's, certificate holder's, or registrant's practice area and shall not preclude the state regulatory board that oversees the applicant's, licensee's, certificate holder's, or registrant's practice area from taking disciplinary action against an applicant, licensee, certificate holder, or registrant for failure to comply with this section. A license, certification, or registration shall not be issued, renewed, reinstated, or reactivated if the
applicant has failed to pay a fine imposed pursuant to this subsection (9).
