**Subject:** Requiring Schools and Universities operating within specific hours of specific days of the week, to mention or post their operating hours on their building of operation, welcoming customers. The submission of this initiative is a proposed measure to the legislative council.

It is pretty clear, that, sometimes unfortunate events may lead to the discovering of issues within an organization or the existence of a loophole within a certain law. We, as citizen of the great state of Colorado, have come together to notice that, some of the operating entities within the state, have neglected to post their operating hours on their place of Business. This, would not be an issue, if and only if, the so-called entity or organization, did not welcome third party of clients within their walls or place of business.

The Auraria campus, as big as it is, with an exceptional customer based of about 53,000 students and staffs, with annex buildings located all across the city of Denver, has neglected to post or make their client aware of their operating hours. This has created a lot of confusion, within their current clientele.

We as people and potential customers, would like to submit, a proposed measure, as a constitutional amendment to the legislative

council, to require, businesses in the state of Colorado, that welcome their clients, within their place of business, to post their operating hours, in order to avoid confusion, and limit the issues of trespassing. It takes more than posting a "no trespassing" sign on a private property or place of business, to notify, possible clients of the no trespassing policy of a business. The clients, need to be aware of whether or not, the place of business, is operating 24hrs a day, or is operating within a certain time of the day, on specific days of the week.

We as people, are willing to start a petition to collect enough signatures from clients, and possible clients of these businesses in order to validate this proposed initiative.
