Well blow-out near
Windsor, CO in
Feb. 2013

Impact area was
about 1500 ft.

Frederick, Colorado Weld Co. Road 18

- **Tank fire April 16, 2014 at 9:00 am**
- **Three fire districts respond**
- **Students in nearby Legacy Elementary had to “shelter in place”**

FLIR video of wells leaking VOCs (volatile organic compounds) by Earthworks. This was happening over the course of weeks, 4-5 times a day, due to thief hatches not closing properly. Plumes of VOCs waft close to the ground, with high impact to people. These plumes can drift for miles over an area.

Northridge High School in Greeley, CO

Northridge High School in Greeley, CO

This plume continued to waft over the neighborhood for a mile.

**April 17, 2015 -
Started by a lightning strike**

**All the foam in Weld County
was used to put the fire
out - took 3 days**

**Three homes were
evacuated - out in the country**

Footage taken by security camera of explosion at Stromberger Wells Dec. 22, 2017 from parking lot of Old Kodak plant. These wells were about one mile away from this parking lot.

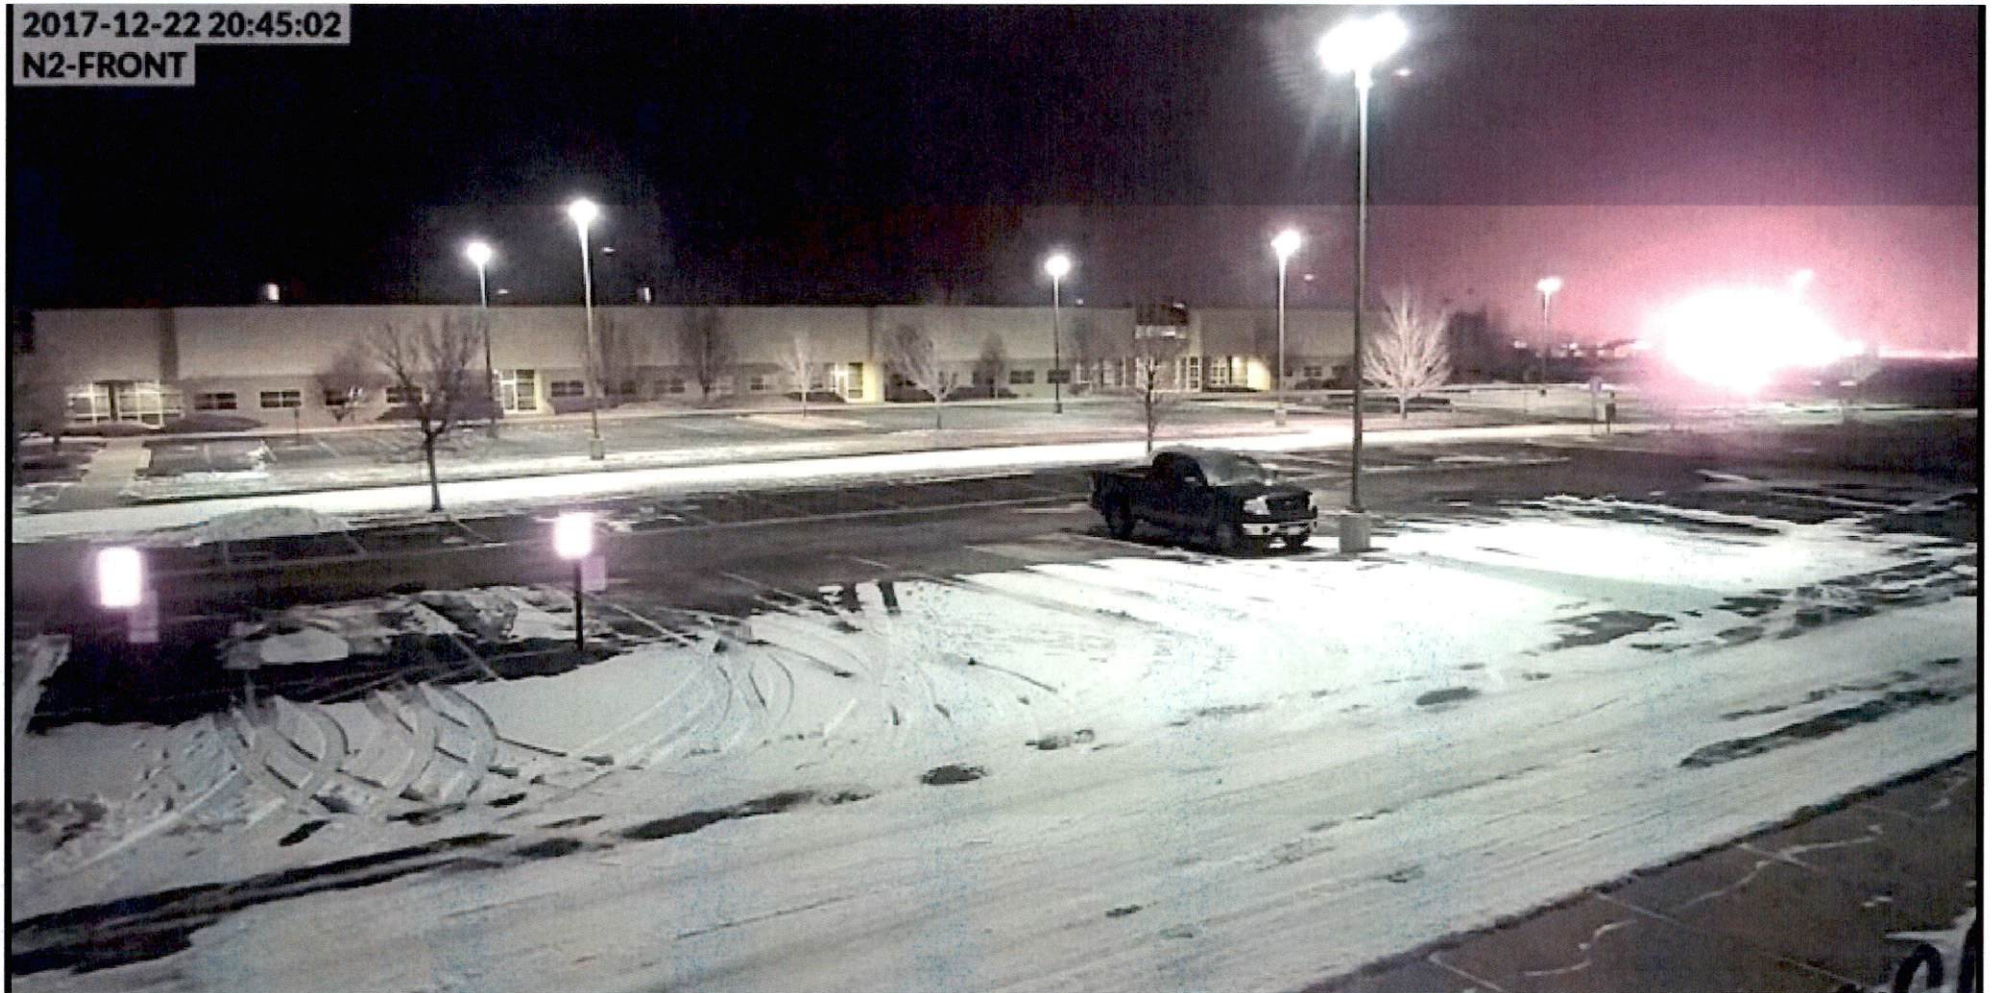

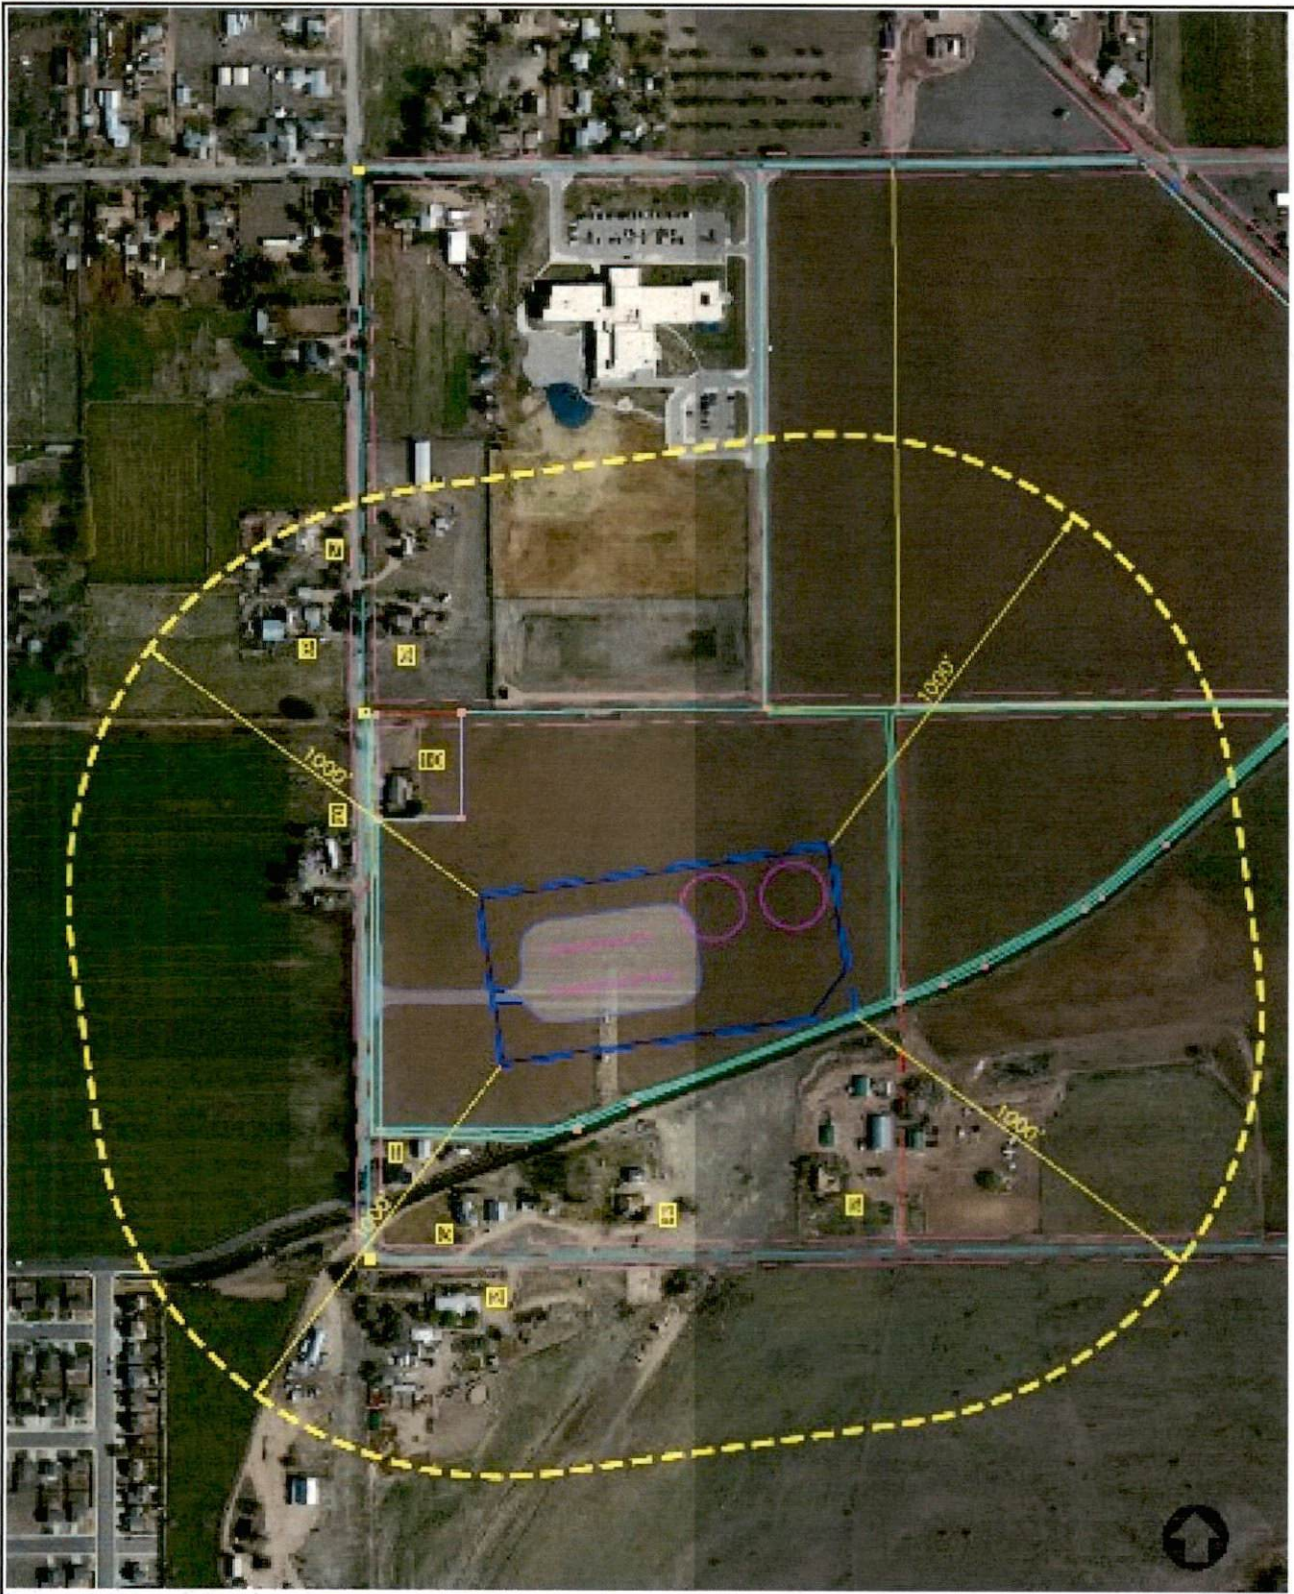

Photo taken of the fire at Stromberger Wells (Extraction) on Dec. 22, 2017. Ten fire departments responded to the fire and it took them approximately 18 hours to extinguish.
