

SB24-011 be amended as follows:

- 1 Amend printed bill, page 3, after line 1 insert:  
2 **"SECTION 1. Legislative declaration.** (1) The general  
3 assembly finds and declares that:  
4 (a) Three in ten adults, including half of 18- to 29-year-olds, in  
5 the United States have used a dating site or app;  
6 (b) 31% of women on dating apps surveyed had been sexually  
7 assaulted or raped by someone they met through a dating app;  
8 (c) Three in four users experienced dating app-facilitated sexual  
9 violence, with the highest rates among LGBTQIA users;  
10 (d) It is relatively easy for minors to create profiles and use dating  
11 apps, because most apps do not verify the identity or age of the account  
12 holder;  
13 (e) Predators have repeatedly used dating app platforms for serial  
14 criminal enterprises for financial fraud, as well as stalking, homicide, and  
15 rape;  
16 (f) Colorado is in the top five most dangerous states for online  
17 dating;  
18 (g) The small size and inexpensive nature of available tracking  
19 devices enable tracking devices to increasingly be used to track people  
20 and their property without consent;  
21 (h) From 2019 to 2023, there was a 550% increase in sexual  
22 deepfakes published online;  
23 (i) Intimate image abuse, including images that are digitally  
24 created or altered, affects survivors' mental health, including a high risk  
25 of suicide, and may negatively impact survivors' employment prospects,  
26 academic success, and physical well-being; and  
27 (j) The risks and reality of technology-facilitated crimes impacts  
28 the public and is a matter of statewide public safety and concern.  
29 (2) Therefore, in order to improve the public health, safety, and  
30 welfare of Coloradans, it is necessary to ensure that:  
31 (a) Each online dating service develops thoughtful and transparent  
32 safety policies that are posted in a conspicuous place on the service's  
33 website or app for users;  
34 (b) Online dating services take prompt remedial action for  
35 misconduct carried out through dating sites or apps;  
36 (c) Data regarding the frequency of reported misconduct and the  
37 responses of dating sites or apps is tracked and available to consumers;  
38 (d) An online dating service can be held accountable when it fails  
39 to act on reports of misconduct or criminal attacks;  
40 (e) Consent is required for tracking a person or another's property;  
41 and  
42 (f) Existing intimate image abuse laws include deepfakes and  
43 digitally altered images."  
44 Renumber succeeding sections accordingly.
