department of natural resources to expand the division's capacity for outdoor recreation coordination, planning, and management and take a leading role in state-level coordination, strategic planning, and implementation of Colorado's outdoors strategy. The division is directed to, among other things, engage with relevant partners, stakeholders, and agencies to coordinate and incorporate wildlife, conservation, recreation, and climate-resilience considerations across agency planning and decision-making processes.

In addition, the division is required to support, in consultation with relevant entities, the planning, development, and maintenance of outdoor recreation infrastructure to enhance outdoor recreation opportunities while protecting private property rights, wildlife, and natural resources.

The bill also requires the division to create, and update at least annually, integrated regional outdoor recreation and conservation planning reports to inform division awareness and operational decision-making.

1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Short title.** The short title of this act is the
3 "Colorado Outdoor Opportunities Act".

4 **SECTION 2. Legislative declaration.** (1) The general assembly
5 finds and declares that:

6 (a) It is the policy of the state of Colorado that the state's
7 unparalleled landscapes, wildlife, public lands, and outdoor experiences
8 be protected, conserved, and enhanced for the benefit and enjoyment of
9 current and future generations, while protecting the state's agricultural
10 heritage and private property rights;

11 (b) Outdoor recreation, access to quality outdoor experiences, and
12 the conservation of lands and wildlife habitats, all within the context of
13 a changing climate and growing population, are vital components in
14 ensuring a thriving future for Colorado's outdoors;

15 (c) Outdoor recreation is fundamental to Colorado's economy,
16 culture, and identity, contributing to public health, community well-being,

1 and the development of lifelong connections to the outdoors. Outdoor
2 recreation annually contributes \$65.8 billion to Colorado's economy and
3 supports 404,000 jobs, over 12% of the entire labor force in Colorado.

4 (d) Outdoor recreation's significant economic, fiscal, and
5 community benefits across the state include revenue that supports public
6 services, infrastructure, and investments, from transportation to child care
7 and mental health services, that contribute to the health, safety, and
8 welfare of Coloradans. It is important that these benefits be equitably
9 distributed throughout the state to the extent possible.

10 (e) Ensuring safe, high-quality outdoor experiences through
11 purposeful planning, coordination, and management is essential to
12 sustaining the state's outdoor heritage;

13 (f) Connecting youth to outdoor experiences is vital for ensuring
14 the long-term well-being of the state's residents, since research
15 demonstrates that outdoor engagement supports improved cognitive
16 abilities, fosters creativity and resilience, and is essential for promoting
17 public health and reducing stress, and many communities face barriers to
18 accessing the outdoors and the benefits of spending time in nature;

19 (g) Colorado's outdoors face significant and urgent pressures from
20 growing populations, human disturbance, and development, alongside
21 severe climate-driven impacts such as wildfires, drought, and rising
22 temperatures. It is essential that the state play an active role in
23 appropriately managing these pressures to ensure Colorado's outdoors are
24 available for future generations.

25 (h) Thoughtful planning and management of outdoor recreation
26 and associated infrastructure should consider economic, fiscal, and
27 service-related impacts on local communities and regions and can support

1 conservation goals by reducing resource impacts, improving stewardship,
2 and sustaining the long-term health of the state's public lands;

3 (i) Colorado has a long-standing tradition of managing public
4 lands and working landscapes to support a range of compatible uses and
5 affirms that coordinated outdoor recreation management can occur
6 alongside conservation, agricultural operations, and other land uses in
7 ways that support long-term resource stewardship and community values;

8 (j) As more visitors and Coloradans participate in all forms of
9 outdoor recreation, it is important to advance exceptional recreation
10 experiences that are accessible, inclusive, and sustainable so that future
11 generations may continue to enjoy the state's world-class outdoor
12 opportunities;

13 (k) To effectively manage these challenges, the state must
14 formalize and strengthen collaboration across conservation, wildlife,
15 agriculture, and recreation partners, local governments, Tribal
16 governments, and federal land managers, including by soliciting rural
17 perspectives; develop shared tools and data; advance coordinated
18 planning that recognizes that Colorado's public and private lands support
19 multiple uses; and align funding to support voluntary, strategic actions
20 that sustain high-quality recreation opportunities while maintaining
21 resilient landscapes, wildlife habitat, working lands, and community
22 values for all Coloradans;

23 (l) Colorado's outdoors strategy, developed by the department of
24 natural resources, the division of parks and wildlife, great outdoors
25 Colorado, the office of climate preparedness in the governor's office, and
26 the outdoor recreation industry office in the office of economic
27 development, in collaboration with partners and stakeholders, provides

1 the necessary statewide vision and coordination to advance conservation,
2 climate resilience, and outdoor recreation opportunities. One strength of
3 Colorado's outdoors strategy is its voluntary approach that allows partners
4 to leverage opportunities that support locally determined needs.

5 (m) The general assembly recognizes the role that the Colorado
6 outdoor regional partnerships initiative, created by the governor's
7 executive order B 2020 008, plays in convening vital perspectives,
8 partners, and expertise in land conservation, land use, and recreation
9 planning. The initiative is a locally driven and powerful platform for early
10 and proactive coordination among stakeholders, helping to identify shared
11 priorities, reduce conflict, and advance tangible outcomes for outdoor
12 recreation and conservation statewide. It is the intent of the general
13 assembly that the initiative remains a voluntary and locally derived
14 process with opportunities for stakeholder engagement, including county
15 governments.

16 (n) The division of parks and wildlife engages and will continue
17 to engage in formal consultation with Tribal governments, including the
18 Southern Ute Indian Tribe and Ute Mountain Ute Tribe, which are the
19 two federally recognized tribes with reservations in Colorado, when the
20 division is requested to do so and when issues of importance to Tribal
21 governments arise, which issues concern outdoor recreation or division
22 actions on state public lands that may affect Tribal sovereignty or treaty
23 rights of the Tribal governments in Colorado, including history, culture,
24 and natural and cultural resources;

25 (o) Meaningful engagement with tribal nations is important, and
26 the collaborative framework developed in Colorado's outdoors strategy
27 is crucial to support ongoing tribal participation in statewide outdoor

1 recreation and conservation efforts;

2 (p) The outdoor recreation industry office plays a vital role in
3 advancing outdoor recreation. The mission of the office is to champion
4 industry, communities, and people through Colorado's great outdoors. The
5 office is a vital partner for the division of parks and wildlife in
6 coordinating outdoor recreation industry partnerships and supporting the
7 division in planning and outcomes for the advancement of exceptional
8 and sustainable outdoor recreation opportunities.

9 (q) Local governments are critical partners in outdoor recreation
10 planning, coordination, and management, and recreation impacts
11 communities in different ways. The rapid increase in demand for outdoor
12 recreation is challenging local governments' ability to maintain access and
13 provide related services. For example, counties and municipalities
14 frequently experience increased and unique demands related to outdoor
15 recreation, including emergency services. Counties are well suited to
16 convene area partners and play a critical role in identifying and
17 addressing localized impacts of recreation, and state coordination should
18 incorporate local perspectives to reduce unintended burdens on
19 community infrastructure and services. It is essential that the state work
20 in partnership with local governments to manage these impacts and
21 advance locally driven visions for outdoor recreation.

22 (r) With approximately 60% of Colorado land in private
23 ownership, working with private landowners is also essential to the
24 success of Colorado's outdoors strategy, and it is important to ensure that
25 agricultural interests, private landowners, including private landowners
26 adjacent to outdoor recreation development, and local governments are
27 integrally involved in state efforts; wildlife habitats are protected; and

1 private property rights are upheld as conservation and recreation
2 management decisions are made;

3 (s) The division of parks and wildlife possesses a long history of
4 outdoor recreation planning, management, and recreational asset delivery
5 through its state parks system, which serves as a significant source of
6 exceptional and accessible outdoor recreation opportunities. The
7 division's responsibilities extend beyond state park boundaries and
8 encompass outdoor recreation coordination, wildlife conservation, and
9 support for partners managing lands across all jurisdictions. As a leader
10 in outdoor recreation management, the division is well-positioned to play
11 a critical coordinating role in advancing outdoor recreation planning and
12 management statewide, beyond the boundaries of its current 43 state
13 parks. It is the intent of the general assembly to formalize the division's
14 role in meeting these responsibilities, without diminishing the division's
15 long-standing responsibilities.

16 (t) The division of parks and wildlife assumes lead responsibility
17 as the state's coordinating entity for advancing implementation of
18 Colorado's outdoors strategy, in partnership with the department of
19 natural resources, great outdoors Colorado, the outdoor recreation
20 industry office, the office of climate preparedness, and other state and
21 local government partners. In this role, the division facilitates early and
22 proactive coordination and planning among agencies and stakeholders to
23 reduce conflict, improve efficiency, and ensure accountability in
24 advancing its goals and vision to find mutually beneficial outcomes that
25 support and maintain Colorado's world-class outdoor recreation and
26 natural resources.

27 (2) The general assembly further finds the need to expand and

1 strengthen the division of parks and wildlife's capacity for the
2 coordination, planning, development, and management of Colorado's
3 outdoor recreation to ensure the state's recreation opportunities provide
4 high-quality visitor experiences that are responsibly managed to align
5 natural resources, wildlife, agricultural heritage, private property, and
6 public safety. The general assembly further recognizes that 36% of
7 Colorado is federal public land and a significant amount of recreation in
8 Colorado occurs on federal public lands; therefore, there is a growing
9 need for the division to support recreation management and stewardship
10 on federal public lands, which necessitates increased staff capacity and
11 enhanced coordination with federal land management agencies, without
12 expenditures from the wildlife cash fund created in section 33-1-112
13 (1)(a), Colorado Revised Statutes.

14 **SECTION 3.** In Colorado Revised Statutes, 33-10-102, **add** (1.5),
