licensed by the board. The board is authorized to license behavior analysts and assistant behavior analysts if they meet the requirements specified by the bill and the rules adopted by the board pursuant to the bill.

An individual who seeks to practice as a behavior analyst or assistant behavior analyst must meet the following requirements:

- File an application for a license;
- Have a valid certification in good standing with a certifying entity;
- Complete a fingerprint-based criminal history record check; and
- If the individual seeks to practice as an assistant behavior analyst, be supervised by a licensed behavior analyst.

The board may deny or refuse to renew a license, suspend or revoke a license, impose probationary conditions on a license, or issue a cease-and-desist letter or seek injunctive relief against a licensee or an applicant for licensure who has engaged in specified grounds for discipline or unprofessional conduct.

The bill exempts specified individuals from the licensing requirements established by the bill.

An individual who practices or offers or attempts to practice as a behavior analyst or assistant behavior analyst without being licensed pursuant to the bill and who is not exempted from licensure commits a class 2 misdemeanor.

The board shall adopt rules as necessary to implement the bill.

The regulation of behavior analysts and assistant behavior analysts is scheduled for repeal on September 1, 2031. Before the repeal, the functions of the board in regulating applied behavior analysis are scheduled for review in accordance with the sunset law.

The bill requires the department of health care policy and financing (state department) to reimburse an applied behavior analysis provider for applied behavior analysis services provided by a behavior technician certified by a certifying entity to a medicaid member with autism spectrum disorder or other conditions for which coverage may be available under state department policies. The state department shall reimburse the applicable applied behavior analysis provider for applied behavior analysis services provided by a behavior technician who is required by the state department to be certified by a certifying entity, but is not certified at the time of services, for services provided during a temporary period of not less than 60 days while the behavior technician is pursuing the certification.

The department of human services (department) is required to prescribe and publish separate standards for the licensing of applied behavior analysis clinics (clinics). The department is authorized to adopt rules concerning specific subjects related to standards for clinics. Clinics are required to comply with specified requirements regarding local

government zoning regulations, licensing fees, and qualifications for employees of the clinics.

1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Legislative declaration.** (1) The general assembly
3 finds and declares that:

4 (a) The practice of applied behavior analysis affects the health,
5 safety, and welfare of the citizens of Colorado and should be subject to
6 regulation to protect the public from:

7 (I) The practice of applied behavior analysis by unqualified
8 persons; and

9 (II) Unprofessional, unethical, or harmful conduct by behavior
10 analysis practitioners;

11 (b) The practice of applied behavior analysis by any individual
12 who is not licensed or practicing as permitted by this act is inimical to the
13 general public welfare. It is not, however, the intent of this act to restrict
14 the practice of any individual duly licensed, certified, or registered under
15 other laws of this state from practicing within the individual's scope of
16 competency and authority under those laws.

17 (c) The practice of behavior analysis in clinical settings where
18 children may regularly be in therapy for several hours in a private facility
19 warrants additional oversight for facility safety and any nontherapeutic
20 operations. Such oversight must, however, be subject to and coordinated
21 with professional licensing rules and requirements to ensure efficiency
22 and access to medically necessary care and compliance with other federal
23 and state laws.
