grant award by applying for the reimbursement of costs incurred in completing the activity for which the state agency awarded the grant.

The bill allows a state agency, in contracting with any grantee, to dispense up to 25% of the total value of the payments under the contract to the grantee immediately upon executing or renewing the contract. A grantee may only expend money from such a payment on expenses that the grantee incurs in connection with the relevant contract.

The bill does not prevent a state agency, in contracting with a grantee, from:

- Using a waiver process available through state or federal rules to dispense a percentage of the total value of the payments under a contract to a grantee immediately upon the execution or renewal of the contract; or
- For a state agency that, as of the effective date of the bill, already dispenses a percentage of the total value of the payments under a contract to a grantee immediately upon executing or renewing the contract, continuing to dispense the payments as it did before the effective date of the bill.

A grantee that is paid a percentage of the total value of the payments under a contract with a state agency immediately upon executing or renewing the contract is required to comply with all of the reporting requirements specified in the contract.
