Bill Summary

(Note: This summary applies to this bill as introduced and does not reflect any amendments that may be subsequently adopted. If this bill passes third reading in the house of introduction, a bill summary that applies to the reengrossed version of this bill will be available at <http://leg.colorado.gov>.)

On and after July 1, 2026, the bill requires certain internet websites that knowingly and intentionally publish or distribute material that is harmful to children (covered platforms) to:

- Perform one or more reasonable age verification measures to verify the age of each individual who attempts to access

- such material;
- Prevent children from accessing such material; and
- Arrange for annual independent audits of the results of the covered platform's reasonable age verification measures.

On and after July 1, 2026, a covered platform must offer each user at least one option by which the covered platform may verify the user's age without the user having to disclose the user's identity. For this purpose, a covered platform must employ commercially available technologies that are independently certified to be highly effective in establishing that an individual is not a child.

A covered platform may not rely solely upon the geographical registration of an internet protocol address to determine a user's location and must apply extensive due diligence based on available technology before concluding that an individual is not located in Colorado.

A covered platform must ensure that each reasonable age verification measure that the covered platform employs includes a means by which a potential user of the covered platform may appeal a determination concerning the potential user's age.

A covered platform that acquires personal data for the purposes of age verification must destroy the personal data as soon as reasonably possible after a potential user's age is checked for age verification. In acquiring and retaining personal data, a covered platform must otherwise comply with the requirements of the "Colorado Privacy Act".

1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Legislative declaration.** (1) Recognizing the
3 widespread availability of online pornographic content and its potential
4 harm to minors, the general assembly finds it necessary to require the
5 implementation of age verification measures to prevent youth from
6 accessing such material. This declaration affirms the state's commitment
7 to safeguarding children from exposure to explicit content that may
8 negatively impact their development, while protecting the rights of
9 individuals 18 years of age and older. By requiring robust and effective
10 age verification systems for access to online pornography, and requiring
11 a nonidentity-document-based option, this legislation seeks to uphold the
12 well-being of minors while respecting the rights of adults to lawful

1 access.

2 (2) The general assembly also finds that:

3 (a) Extensive research has demonstrated that exposure to
4 pornography at a young age can contribute to adverse public health
5 outcomes, including increased rates of anxiety, depression, and distorted
6 perceptions of healthy relationships and consent;

7 (b) Studies indicate that early and repeated exposure to sexually
8 explicit material is linked to compulsive behaviors, desensitization to
9 violence, and unrealistic expectations about intimacy, which can have
10 long-term consequences on minor viewers' mental and emotional
11 well-being;

12 (c) Leading public health organizations emphasize the need for
13 protective measures to prevent premature exposure to pornography, citing
14 its potential to negatively influence adolescent brain development and
15 social behavior; and

16 (d) The expanding sophisticated adoption of technology has made
17 traditional age verification measures, such as simple self-attestation or
18 parental controls, ineffective in preventing underage access to explicit
19 online material, necessitating stronger safeguards for public health
20 protection.

21 (3) Therefore, the general assembly declares that:

22 (a) This act is a critical public health measure and is intended to
23 require effective and enforceable age verification measures for accessing
24 online pornography websites that are accessible within the state; and

25 (b) The general assembly remains committed to ensuring that any
26 regulatory measures respect user privacy while achieving the paramount
27 goal of promoting public health and protecting minors from harmful

1 exposure to explicit content.

2 **SECTION 2.** In Colorado Revised Statutes, **add** article 29 to title
3 6 as follows:
