

STATE OF COLORADO

COLORADO DIGITAL SOUL MASTER SETTLEMENT DIRECTIVE

Be it Enacted by the People of the State of Colorado:

One Sentence Pitch: Corporations made billions off your information since 2014. They owe you.

ENACTING CLAUSE

Be it Enacted by the People of the State of Colorado:

SECTION 1 — ATTORNEY GENERAL DIRECTIVE

This directive does not create new authority. It repoints existing authority at a newly codified harm. The Attorney General's existing consumer protection enforcement toolkit is hereby expanded to explicitly include: disgorgement of unjust enrichment from pre-Act Digital Soul exploitation; restitution to Colorado residents through the Master Deed distribution waterfall; and civil penalties for documented willful exploitation.

SECTION 2 — DIGITAL SOUL EXPLOITATION COMMENCEMENT DATE

SECTION 3 — CLASS PRESUMPTION

SECTION 4 — EIGHT DOCUMENTED HARM CATEGORIES

The Attorney General shall pursue disgorgement across all eight documented harm categories:

- (1) Data harvesting without compensation — systematic collection of Colorado resident behavioral and identifying data for commercial monetization without consent or payment.
- (2) Hardware hoarding and compute monopolization — artificial suppression of AI infrastructure access through bulk acquisition denying Colorado residents and businesses access to AI development tools.
- (3) Algorithmic wage suppression — gig economy platforms using AI to systematically suppress contractor compensation below market rates.
- (4) Automated labor displacement without compensation — deployment of automation replacing Colorado workers without contribution to any worker transition fund.
- (5) Algorithmic housing discrimination — automated tenant screening systems that systematically excluded Colorado residents based on protected class proxies.

(6) Surveillance capitalism behavioral manipulation — deliberate engineering of addictive behavioral loops using AI systems to maximize engagement at documented cost to user mental health and autonomy.

(7) Algorithmic credit and insurance discrimination — AI-driven underwriting systems using Digital Soul proxies to discriminate in financial services decisions.

(8) AI-driven price manipulation — algorithmic pricing systems that coordinated price increases across competitors in markets affecting Colorado residents.

SECTION 5 — UNIFIED CLAIM STRUCTURE

SECTION 6 — DISGORGEMENT CALCULATION

SECTION 7 — BURDEN SHIFT

The statute presumes harm from documented conduct and requires the entity to demonstrate why disgorgement should not apply. The burden shifts. Entities dispute individual categories against a statute that already defines the harm, establishes the valuation methodology, and directs the AG to pursue disgorgement.

SECTION 8 — DISTRIBUTION

All recovered proceeds flow into the CAMT enterprise fund and distribute through the Master Deed waterfall to registered Colorado residents weighted by documented harm exposure period. Residents who were digitally active earlier in the 12-year window receive proportionally more because they were exposed longer before any protection existed.

SECTION 99. EFFECTIVE DATE.

This measure takes effect from and after the date of the official declaration of the vote thereon by proclamation of the governor, as provided in section 1 (4)(a) of article V of the Colorado constitution.
