Legislation adopted in 2007 required rate-regulated electric utilities to conduct biennial reviews, on or before October 31 of each odd-numbered year, in which the utilities developed plans for transmitting electricity from geographic areas in which energy resources were likely to be available to where the electricity would be needed. The bill preserves the requirement for biennial review but changes the due date for those reviews from October 31 to another date determined by the Colorado public utilities commission. The bill also deletes existing requirements that:

- ! Reviews be simultaneously conducted by the Colorado public utilities commission; and
- ! The commission issue an order approving or rejecting an application for a certificate of public convenience and necessity for construction or expansion of transmission facilities within 180 days.
