Bill Summary

(Note: This summary applies to this bill as introduced and does not reflect any amendments that may be subsequently adopted. If this bill passes third reading in the house of introduction, a bill summary that applies to the reengrossed version of this bill will be available at <http://leg.colorado.gov>.)

Current law finances the state's water quality program with a mix of general fund money and fees that are paid by sources that discharge pollutants into the state's waters. **Section 2** of the bill raises the fees and establishes goals for future adjustments of the ratio of revenue from fees and the general fund as follows:

Section 4 appropriates \$433,042 from the general fund to the department of public health and environment for use by the water quality control division, and **section 5** appropriates \$774,965 to the department for use by the division from the 6 water quality sector funds.

1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Legislative declaration.** (1) The general assembly
3 hereby:

4 (a) Finds that:

5 (I) A significant portion of the financing for the state's clean water
6 program is provided by fees paid by sources that discharge pollutants into
7 the state's waters;

8 (II) Revenue from these existing fees has become insufficient to
9 maintain the program, and the fees for three sectors - commerce and
10 industry, public and private utilities, and municipal separate storm sewer
11 - have not been raised since 2007; and

12 (III) The department of public health and environment and clean
13 water program stakeholders have recommended appropriate and
14 necessary fee adjustments and a general fund contribution to adequately
15 fund the department's water quality control division;

16 (b) Determines that:

17 (I) The department's use of funding provided in this act should be

1 limited to processing permits, providing technical and compliance
2 assistance, processing site application and design reviews, and
3 maintaining stakeholder involvement for all aspects of the clean water
4 program; and

5 (II) The department should develop production metrics for permit
6 issuance, site application and design review, and inspections and should
7 continue to report on costs associated with the clean water sectors; and

8 (c) Declares that this act is necessary to protect water quality
9 while providing necessary services on which Colorado businesses rely.

10 **SECTION 2.** In Colorado Revised Statutes, 25-8-502, **amend**
