Under existing law, one of the performance indicators for determining the level of performance of a public high school, a school district, the state charter school institute (institute), or the state is the

degree to which high school graduates demonstrate postsecondary and workforce readiness. The performance indicator is currently measured by the high school's graduation and dropout rates; the percentage of high school graduates who receive a diploma with a postsecondary and workforce readiness endorsement; students' scores on the state assessments administered in grades 9 through 11, including the achievement college entrance exam; and the percentages of students who graduate and matriculate in the next school year into a postsecondary education option.

The bill adds as an additional measure for determining attainment of the postsecondary and workforce indicator the percentage of students enrolled in high school who demonstrate college and career readiness, based on the demonstration options available to the students enrolled in each public high school, at a level that indicates that the student is prepared to enroll in postsecondary general education core courses in reading, writing, and math without needing remediation.

The bill defines the demonstration options as those adopted by the state board of education in adopting the high school graduation guidelines. The state board must set achievement standards for each demonstration option that indicate the minimum achievement level required for high school graduation and a higher achievement level that indicates that the student is prepared to enroll in postsecondary general education core courses in reading, writing, and math without needing remediation.

The bill requires each school district and the institute to report to the department of education the graduation requirements that the school district, each charter high school of the school district, and each institute charter high school adopts, including the options available to high school students for demonstrating college and career readiness.

1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Legislative declaration.** (1) The general assembly
3 finds that:

4 (a) Measures for the postsecondary and workforce readiness
5 performance indicator were originally adopted as part of the "Education
6 Accountability Act of 2009", article 11 of title 22. The measures took into
7 account the data available at the time for determining whether public high
8 schools, school districts, and the state charter school institute were

1 successfully graduating students who were prepared for postsecondary
2 education or to enter the workforce.

3 (b) Since 2009, the state board of education, as required by
4 statute, has adopted high school graduation guidelines. School districts
5 and district and institute charter high schools are required to adopt local
6 high school graduation requirements that meet or exceed the state
7 guidelines and implement these requirements beginning in the fall of
8 2017 for the graduating class of 2021.

9 (c) The state high school graduation guidelines include a list of
10 performance demonstrations that high school graduates may complete to
11 demonstrate that they are academically ready for college and career. Each
12 school district and each district or institute charter high school must select
13 from this list those demonstrations that its students must successfully
14 complete in order to graduate from high school. Thus, the performance
15 of the school district or charter high school in enabling students to
16 successfully complete the demonstrations will be reflected in the school
17 district's and the state charter school institute's overall graduation rate and
18 in the individual graduation rates of the public schools of the school
19 district and the institute charter high schools.

20 (d) Many of the options for demonstrating college and career
21 readiness, such as successfully completing advanced placement or
22 international baccalaureate assessments or successfully enrolling in
23 postsecondary courses through concurrent enrollment, empower students
24 to demonstrate that they are working toward goals beyond high school
25 graduation, often leading to higher levels of academic achievement while
26 they are enrolled in high school and when they subsequently enroll in
27 postsecondary education;

1 (e) As adopted by the state board, the standards of achievement
2 for the college and career readiness demonstrations reflect readiness for
3 some levels of postsecondary enrollment, but they do not demonstrate that
4 a student is prepared, without needing remediation, to enroll in the
5 postsecondary general education core courses in reading, writing, and
6 mathematics identified pursuant to section 23-1-125 (3);

7 (f) A student's level of achievement of some of the demonstration
8 options may be measured objectively by a score. For those demonstration
9 options, the state board of education should adopt both minimum
10 achievement standards and higher achievement standards that indicate a
11 student is prepared, without needing remediation, to enroll in the
12 postsecondary general education core courses in reading, writing, and
13 mathematics identified pursuant to section 23-1-125 (3). These higher
14 achievement standards will enable the state to give a public high school,
15 a school district, and the state charter school institute additional
16 performance credit based on the number of high school students who
17 successfully demonstrate that they are prepared to enroll in these
18 postsecondary general education courses without need for remediation.

19 (g) Enrolling in and receiving college-level credit for the
20 postsecondary general education core courses in reading, writing, and
21 mathematics identified pursuant to section 23-1-125 (3) while a student
22 is in high school also clearly demonstrates that a student is college- and
23 career-ready before high school graduation. It is appropriate that each
24 public high school, each school district, and the state charter school
25 institute receive additional performance credit for the percentage of high
26 school students who achieve this level of preparation before high school
27 graduation.

1 (2) The general assembly finds, therefore, that it is appropriate to
2 adopt additional measures for the postsecondary and workforce readiness
3 performance indicator to determine the degree to which public high
4 schools, school districts, and the state charter school institute enable high
5 school students to successfully demonstrate that they are ready for college
6 and career and the extent to which the public high schools, school
7 districts, and the state charter school institute encourage high school
8 students to enroll in, and prepare them to successfully complete,
9 postsecondary core courses in reading, writing, and mathematics.

10 **SECTION 2.** In Colorado Revised Statutes, 22-11-103, **amend**
