### Points to Consider

#### *Technical Issues*

The appropriation clauses in the current bill do not include a specific end date, but allow the Department of Natural Resources to access appropriated cash funds for the designated purpose until funds are fully expended. This is consistent with appropriation clauses in prior-year CWCB projects bills. Pursuant to Section 37-60-121, C.R.S., the CWCB has the authority, but not an obligation, to deauthorize any remaining funds upon completion of a project or when a project is no longer feasible. The Department has indicated that the CWCB's internal financial policy is to revisit grants and loans every three years to evaluate whether they should continue at the same level or be deauthorized, either in full or in part, and reverted to the appropriation or the CWCB Construction Fund.
