Section 1 of the bill disqualifies an internet service provider (ISP) from receiving money from the high cost support mechanism if the ISP engages in any of the following practices:

1. Blocking lawful internet content, applications, services, or devices unless such blocking is conducted in a manner consistent with reasonable network management practices;
2. Engaging in paid prioritization of internet content;
3. Regulating network traffic by throttling bandwidth or otherwise impairing or degrading lawful internet traffic on the basis of internet content, application, service, or use of a device unless the impairment or degradation is conducted in a manner consistent with reasonable network management practices; or
4. Not providing reasonable transparency regarding its network management practices.

Section 1 also requires that, if an ISP is found to have engaged in any of the practices listed above, the ISP must refund any money that it received in the prior 24 months from the high cost support mechanism or from any other state support mechanism or other state funding source established to help finance broadband deployment.

Section 2 requires the broadband deployment board (board) to periodically review the federal trade commission's and federal communications commission's websites to identify any actions the federal agencies may have taken against an ISP that seeks or has received broadband deployment grant money from the board. If the board determines from a review of the federal agency action that the ISP engaged in one of the practices listed above, the board shall deny the application or inform the public utilities commission of the action.

Section 3 requires the attorney general or the attorney general's designee, in collaboration with the board, to develop guidance for consumers on how to file a complaint with the federal trade commission to allege that an ISP has engaged in any of the practices that violate federal law regarding interference with the open internet. The department of law shall post the guidance on its website.

Section 4 requires a governmental body, when contracting for broadband internet access service, to give preference to an ISP that
certifies to the governmental body that it will not engage in any of the practices listed in section 1.

Be it enacted by the General Assembly of the State of Colorado:

SECTION 1. In Colorado Revised Statutes, add 40-15-209 as follows:

(b) engages in paid prioritization of internet content;

(c) regulates network traffic by throttling bandwidth or otherwise impairs or degrades lawful internet traffic on the basis of internet content, application, service, or use of a nonharmful device unless the impairment or degradation results solely from the evenhanded application of reasonable network management practices; or

(2) (a) If the Commission learns from the Broadband Deployment Board that a Federal agency has issued a final order or entered into a settlement or consent decree regarding, or a court of competent jurisdiction has issued a final judgment against, an Internet service provider and that the Board has determined from the order, decree, or judgment that the Internet service provider has engaged in conduct specified in subsection (1) of this section, the Commission shall issue a written order to the Internet service provider requiring the Internet service provider to fully refund any money that the Internet service provider received in the twenty-four months preceding the Board’s determination from the High Cost Support mechanism pursuant to a grant awarded by the Broadband Deployment Board under Section 40-15-509.5.
