Improvement Act of 2018" (federal act), which removed hemp from schedule I of the federal "Controlled Substances Act". The federal act requires the United States department of agriculture (USDA) to develop a plan for the regulation of hemp and authorizes each state to seek approval from the USDA to have primary regulatory authority over hemp production within the state by preparing and submitting a state plan of regulation to the secretary of the USDA.

The bill updates the laws governing Colorado's industrial hemp regulatory program to align with the federal act and to put the department of agriculture in a position to prepare and submit a state plan to the secretary of the USDA.
