**Opioid and Other Substance Use Disorders Study Committee.**

The bill requires the commissioner of insurance (commissioner) to promulgate rules that establish diagnoses of covered conditions for which nonpharmacological alternatives to opioids are appropriate. per year, with a maximum of one copayment per year for 12 covered visits. The bill requires the commissioner to conduct an actuarial study to determine the economic feasibility prior to including acupuncture as a covered alternative treatment. (**section 1** of the bill).

The bill prohibits an insurance carrier (carrier) from limiting or excluding coverage for an atypical opioid or a nonopioid medication that is approved by the federal food and drug administration by mandating that a covered person undergo step therapy or obtain prior authorization if the atypical opioid or nonopioid medication is prescribed by the covered person's health care provider. The carrier is required to make the atypical opioid or nonopioid medication available at the lowest cost-sharing tier applicable to a covered opioid with the same indication (**section 2**).

The bill precludes a carrier that has a contract with a physical therapist, occupational therapist, or acupuncturist from prohibiting the physical therapist, occupational therapist, or acupuncturist from, or penalizing the physical therapist, occupational therapist, or acupuncturist for, providing a covered person information on the amount of the covered person's financial responsibility for the covered person's physical therapy, occupational therapy, or acupuncture services or from requiring the physical therapist, occupational therapist, or acupuncturist to charge or collect a copayment from a covered person that exceeds the total charges submitted by the physical therapist, occupational therapist, or acupuncturist. The commissioner is required to take action against a carrier that the commissioner determines is not complying with these prohibitions (**section 3**).

Current law limits an opioid prescriber from prescribing more than a 7-day supply of an opioid to a patient who has not had an opioid prescription within the previous 12 months unless certain conditions apply, and this prescribing limitation is set to repeal on September 1, 2021. The bill continues the prescribing limitation indefinitely (**sections 4 through 10**).

The bill requires the executive director of the department of regulatory agencies (department) to consult with the center for research into substance use disorder prevention, treatment, and recovery support strategies (center) and the state medical board to promulgate rules establishing competency-based continuing education requirements for physicians and physician assistants concerning prescribing practices for opioids (**section 11**).

The bill modifies requirements for adding prescription information to the prescription drug monitoring program (program) and allows the department of health care policy and financing and the health information organization network access to the program (**sections 12 and 13**).

The bill continues indefinitely the requirement that a health care provider query the program before prescribing a second fill for an opioid and requires each health care provider to query the program before

prescribing a benzodiazepine, unless certain exceptions apply. The bill also requires the director of the division of professions and occupations in the department to promulgate rules designating additional controlled substances and other prescription drugs to be tracked by the program. In addition to current law allowing medical examiners and coroners to query the program when conducting an autopsy, the bill allows medical examiners and coroners to query the program when conducting a death investigation (**sections 13 through 15**).

The bill appropriates money to:

- ! The department of public health and environment annually to address opioid and other substance use disorders through local public health agencies (**section 16**);
- ! The department of health care policy and financing to extend the operation of the substance use disorder screening, brief intervention, and referral to treatment grant program (**section 17**); and
- ! The department of human services for allocation to the center for continuing education activities for opioid prescribers, including education for prescribing benzodiazepines (**section 18**).

The bill directs the office of behavioral health in the department of human services to convene a collaborative with institutions of higher education, nonprofit agencies, and state agencies for the purpose of gathering feedback from local public health agencies, institutions of higher education, nonprofit agencies, and state agencies concerning evidence-based prevention practices (**section 19**).

1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Legislative declaration.** (1) The general assembly  
3 hereby finds and declares that:

4 (a) The opioid epidemic continues to be a tragic and preventable  
5 cause of death and harm in Colorado and nationwide;

6 (b) Vulnerable populations prone to opioid and substance use  
7 disorders are in particular need of help during and after the COVID-19  
8 pandemic;

9 (c) Atypical opioids, such as buprenorphine, tramadol, and  
10 tapentadol, exist on the market as safer alternatives to conventional

1 opioids;

2 (d) According to *Medicine Today*, a peer reviewed journal of  
3 clinical practice, buprenorphine, tramadol, and tapentadol exhibit superior  
4 efficacy in treating chronic pain when compared to conventional opioids  
5 by demonstrating in users:

6 (I) Improved function and quality of life;

7 (II) Less serious adverse effects on immune function and the  
8 endocrine system;

9 (III) Lower rates of some other adverse effects, such as  
10 gastrointestinal effects;

11 (IV) A reduced risk of opioid-induced ventilatory impairment, and  
12 thereby death, in high doses; and

13 (V) Lower abuse potential than conventional opioids and,  
14 therefore, a lower risk of misuse, abuse, and diversion into black markets;

15 (e) Insurance coverage for alternatives to opioids, including safer  
16 drugs and physical therapy, often includes barriers to safer treatment, like  
17 prior authorization and step therapy;

18 (f) Chances of overdose increase when opioids are taken with  
19 benzodiazepines, sedatives commonly prescribed for anxiety and as sleep  
20 aids;

21 (g) More than 30% of overdoses involving opioids also involved  
22 benzodiazepines, according to the National Institute on Drug Abuse;

23 (h) Since 2016, the federal Centers for Disease Control and  
24 Prevention has recommended that clinicians avoid prescribing  
25 benzodiazepines concurrently with opioids whenever possible;

26 (i) Both prescription opioids and benzodiazepines carry warnings  
27 on their labels highlighting the dangers of using these drugs together; and

1 (j) Medical education standards are in need of continuous  
2 development.

3 (2) Therefore, in order to enhance collaboration with health care  
4 providers, promote alternatives to opioids, and prevent more tragic deaths  
5 as a result of opioids, it is the intent of the general assembly to:

6 (a) Mandate that health benefit plans provide coverage for a  
7 minimum amount of physical therapy, occupational therapy, and  
8 acupuncture treatments;

9 (b) Expand health plan coverage to include atypical opioids, such  
10 as buprenorphine, tramadol, and tapentadol, at a low cost;

11 (c) Extend the seven-day limit on opioid prescriptions indefinitely;

12 (d) Establish competency-based continuing medical education  
13 requirements that concern opioid prescription practices for physicians,  
14 physician assistants, and other health care professionals;

15 (e) Incorporate the risk of benzodiazepines usage into provider  
16 education programs;

17 (f) Mandate the designation of additional controlled substances  
18 and other prescription drugs to be tracked by the prescription drug  
19 monitoring program;

20 (g) Extend the requirement that providers must check the  
21 prescription drug monitoring program before prescribing a second fill for  
22 an opioid and before prescribing benzodiazepines, with certain  
23 exceptions; and

24 (h) Allow medical examiners and coroners to query the  
25 prescription drug monitoring program during death investigations.

26 **SECTION 2.** In Colorado Revised Statutes, 10-16-104, **add** (23)  
27 as follows:

7           **(b)** THE COVERAGE REQUIRED BY THIS SUBSECTION (23) MUST:  
8           **(I)** INCLUDE, AT A COST-SHARING AMOUNT NOT TO EXCEED THE

27 stage four advanced metastatic cancer shall not limit or exclude coverage

1 under the health benefit plan for a drug THAT IS approved by the United  
2 States food and drug administration and that is on the carrier's  
3 prescription drug formulary by mandating that a covered person with  
4 stage four advanced metastatic cancer undergo step therapy if the use of  
5 the approved drug is consistent with:

6 (a) (I) The United States food and drug administration-approved  
7 indication or the national comprehensive cancer network drugs and

19 HAS BEEN APPROVED BY THE UNITED STATES FOOD AND DRUG  
20 ADMINISTRATION FOR THE TREATMENT OF ACUTE OR CHRONIC PAIN AT THE

26 THE TREATMENT OF ACUTE OR CHRONIC PAIN.

27 (c) FOR THE PURPOSES OF THIS SUBSECTION (2), "ATYPICAL OPIOID"

1 MEANS A NONOPIOID ANALGESIC WITH FAR LOWER FATALITY RATES THAN  
2 PURE OPIOID AGONISTS.
