systems in the future.

Section 1 of the bill changes this to require that the home builder offer each of these options.

Section 2 requires a home builder to offer one of the following options to a buyer of a newly constructed residence:

- ! An electric vehicle charging system;
- ! Upgrades of wiring to accommodate future installation of an electric vehicle charging system; or
- ! A 208- to 240-volt alternating current plug-in located in a place accessible to a motor vehicle parking area.

Section 2 also requires the home builder to offer electric heating options. These requirements apply to both traditional detached, single-family homes and buildings that contain owner-occupied condominium units.
