Status:** The fiscal note reflects the enacted bill.

Summary of Legislation

The bill requires the Department of Corrections (DOC) to collect and maintain an electronic record of the legal residence, race, and age for all persons entering its custody as soon as practicable after the effective date. By May 1 of a federal decennial census year, the DOC is required to deliver this data to the nonpartisan staff of the General Assembly for use in the redistricting process. When an inmate's legal residence is known, nonpartisan staff is required to reassign that person to the known address instead of using the correctional facility's address. When an inmate's legal residence is unknown or their last known address is outside Colorado, the prisoner is counted at the address of the correctional facility. The bill specifies that data showing the reassignment of inmates are not to be used in the distribution of any state or federal aid.

Background

The federal decennial census process begins in the spring of the first year of each decade and is followed by the redistricting process which begins the following spring.

State Expenditures

The bill will increase workload for the Department of Corrections (DOC) and the Legislative Department beginning in the current FY 2019-20.

Department of Corrections. Workload will minimally increase for the DOC to prepare the data report required under the bill and submit it to the Legislative Department. No change in appropriations is required.

Legislative Department. Workload will increase for the Legislative Council Staff to process the data received by the DOC and reassign individuals as required by the bill. While this workload will be substantial during redistricting years, funding for redistricting commission staff is expected to be sufficient to accommodate the workload increase and no change in appropriations is required.

Effective Date

The bill was signed into law by the Governor and took effect March 20, 2020.
