Bill Summary

(Note: This summary applies to this bill as introduced and does not reflect any amendments that may be subsequently adopted. If this bill passes third reading in the house of introduction, a bill summary that applies to the reengrossed version of this bill will be available at <http://leg.colorado.gov>.)

Section 1 of the bill makes legislative findings.

Section 3 prohibits a cigarette, tobacco product, or nicotine product (product) retailer from selling, offering for sale, advertising for sale, displaying, or marketing in the state any flavored product, and **section 2** defines flavored product as a product imparting a taste or smell other than the taste or smell of tobacco. A retailer, manufacturer of products, or employee or agent of a retailer or manufacturer of products engages in conduct creating a rebuttable presumption that a product is a flavored product if the person makes a public statement or claim, uses text or images, or takes other action directed toward consumers indicating that the product has a taste or smell other than the taste or smell of tobacco.

Section 4 imposes the same penalties for selling, offering for sale, advertising for sale, displaying, or marketing in the state any flavored product that apply to unlawful sales of products to minors.

Section 5 amends the definition of product to include products containing synthetic nicotine, and **section 2** defines synthetic nicotine as nicotine derived from a source other than tobacco.

Section 6 directs the prevention services division in the department of public health and environment (department) to convene a working group to develop, implement, and administer a grant program to award 2-year grants to applicants who are able to provide evidence-informed and individualized wrap-around services in communities disproportionately impacted by targeted tobacco and nicotine marketing and sales or by increased or minimally improved tobacco-use and nicotine-use prevalence rates. **Section 6** also directs the general assembly to appropriate \$10 million from the general fund to the department for the grant program.

1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Legislative declaration.** (1) The general assembly
3 hereby finds that:

4 (a) Colorado has a substantial interest in protecting the health and

1 safety of its residents, including protecting children under 18 years of age,
2 referred to in this section as "youth", as well as young adults under 21
3 years of age, from dangerous products like cigarettes, tobacco products,
4 and nicotine products, referred to collectively in this section as "tobacco
5 products";

6 (b) Use of tobacco products remains the leading cause of
7 preventable death in the United States, killing more than 480,000
8 Americans each year, including 5,100 each year in Colorado;

9 (c) According to a 2016 article in the Journal of the American
10 Medical Association Internal Medicine, "State-level Cancer Mortality
11 Attributable to Cigarette Smoking in the United States", smoking
12 accounts for 25.7% of cancer deaths in Colorado;

13 (d) According to a 2018 publication of the office of the surgeon
14 general, "Surgeon General's Advisory on E-cigarette Use Among Youth",
15 nicotine use can harm the part of the adolescent brain that is responsible
16 for attention, learning, mood, and impulse control, and nicotine use can
17 prime the brain for addiction to other drugs;

18 (e) In that same 2018 publication of the office of the surgeon
19 general, the surgeon general declared that electronic cigarette use among
20 youth is an "epidemic";

21 (f) The office of the surgeon general, in a 2012 report entitled
22 "Preventing Tobacco Use Among Youth and Young Adults: A Report of
23 the Surgeon General", determined that menthol cigarettes and other
24 flavored tobacco products have been shown to be "starter" tobacco
25 products for youth, can become habit-forming, and can lead to long-term
26 addiction;

27 (g) According to a 2013 study conducted by the federal food and

1 drug administration, "Preliminary Scientific Evolution of the Possible
2 Public Health Effects of Menthol versus Nonmenthol Cigarettes",
3 menthol is an appealing option for youth initiating tobacco use because
4 it cools and numbs the throat and reduces irritation;

5 (h) Based on the 2013 study, the federal food and drug
6 administration has determined that menthol cigarettes lead to:

7 (I) Increased initiation of smoking among youth and young adults
8 18 to 24 years of age;

9 (II) Greater addiction to tobacco products; and

10 (III) Decreased success in smoking cessation efforts;

11 (i) According to a 2019 federal centers for disease control and
12 prevention study, "Tobacco Product Use and Associated Factors Among
13 Middle and High School Students - United States, 2019", almost one-half
14 of all high school users of flavored tobacco products use menthol
15 cigarettes;

16 (j) A study in Nicotine and Tobacco Research, "The African
17 Americanization of Menthol Cigarette Use in the United States", states
18 that the tobacco product industry has targeted Black communities for
19 decades by marketing menthol cigarette use through magazine
20 advertising, retail promotions, and sponsorship of community and music
21 events;

22 (k) A 2020 article in Nicotine and Tobacco Research, "Banning
23 Menthol Cigarettes: A Social Justice Issue Long Overdue", states that,
24 while only 29% of White tobacco product users smoke menthol
25 cigarettes, 85% of Black tobacco product users and 50% of Hispanic
26 tobacco product users smoke menthol cigarettes;

27 (l) A 2015 report of the United States surgeon general, "Smoking

1 Cessation", indicated that, in the prior year, Black adult smokers had a
2 higher prevalence of attempts to quit smoking than White adult smokers,
3 but that successful attempts at cessation do not vary by race or ethnicity,
4 thus suggesting that a higher percentage of Black adults than White adults
5 are trying to quit smoking, but are less successful at quitting. Because
6 Black smokers are more likely to use menthol cigarettes than other racial
7 or ethnic groups, menthol cigarettes may play a role in this disparity.

8 (m) In a 1998 report of the United States surgeon general, it was
9 estimated that approximately 45,000 Black Americans die each year from
10 smoking-caused illnesses;

11 (n) A 2015 article in the Journal of the American Medical
12 Association, "Flavored Tobacco Product Use Among US Youth Aged
13 12-17 Years, 2013-2014", indicated that eight out of 10 youth who have
14 ever used a tobacco product first used a flavored tobacco product;

15 (o) That same article indicated that more than three-quarters of
16 youth hookah users report that they use hookah products "because they
17 come in flavors I like";

18 (p) A 2012 report of the United States surgeon general,
19 "Preventing Tobacco Use Among Youth and Young Adults: A Report of
20 the Surgeon General", indicated that hookah smoke contains at least 82
21 toxicants and carcinogens and that smoking hookah is linked to many of
22 the same adverse health effects as cigarette smoking, such as heart disease
23 and lung, bladder, and oral cancers;

24 (q) Electronic cigarettes and other flavored tobacco products have
25 been made available in a variety of kid-friendly flavors, like cotton candy,
26 gummy candy, and pink lemonade;

27 (r) Likewise, cigars are sold in hundreds of flavors to mask the

1 harsh taste of tobacco, such as cherry, brownie, and tropical flavors;

2 (s) A 2019 Healthy Kids Colorado Survey conducted by the
3 Colorado Center for Health and Environmental Data showed that 25.9%
4 of Colorado high school students use electronic cigarettes;

5 (t) According to a 2018 report of the National Academies of
6 Science, Engineering, and Medicine, "Public Health Consequences of
7 E-cigarettes", youth usage of electronic cigarettes is associated with an
8 increased risk of cigarette smoking;

9 (u) A United States department of health and human services
10 report, "Results from the 2019 National Survey on Drug Use and Health:
11 Summary of National Findings and Detailed Tables", estimates that each
12 year, 9,900 Colorado youth will try their first cigarette;

13 (v) According to a 2020 nationwide study by the federal centers
14 for disease control and prevention, "E-cigarette Use Among Middle and
15 High School Students - United States, 2020":

16 (I) More than two million youth nationwide use electronic
17 cigarettes;

18 (II) Nearly 40% of high school students who use electronic
19 cigarettes use them frequently;

20 (III) 85% of youth using electronic cigarettes use flavored
21 products;

22 (IV) Cigars are the second most popular tobacco product for youth
23 and are disproportionately used by Black youth; and

24 (V) The growing market for flavored tobacco products
25 undermines the nation's progress toward reducing overall youth tobacco
26 product use; and

27 (w) A 2021 article in the Journal of the American Medical

1 Association, "Nicotine Pouch Unit Sales in the U.S. From 2016 to 2020
2 - Reply", stated that "[w]hether derived from tobacco plants or
3 synthetically developed in a laboratory, nicotine is an addictive drug with
4 known adverse health consequences", particularly to youth.

5 (2) The general assembly further finds and declares that:

6 (a) Many parents, students, schools, and public health
7 organizations, including the American Cancer Society, the American
8 Lung Association, the American Heart Association, and the Campaign for
9 Tobacco-free Kids, support a prohibition on the sale of all flavored
10 tobacco products; and

11 (b) Therefore, the sale of flavored tobacco products in the state
12 should be prohibited.
