Industrial and manufacturing operations clean air grant program. Section 1 of the bill creates the industrial and manufacturing operations clean air grant program (clean air grant program) through which the Colorado energy office (office) awards grant money to private entities, local governments, and public-private partnerships for voluntary projects to reduce air pollutants from industrial and manufacturing operations.
operations.

Voluntary projects eligible for grant money include:

- Energy efficiency projects;
- Renewable energy projects;
- Beneficial electrification projects;
- Transportation electrification projects;
- Projects producing or utilizing clean hydrogen;
- Projects involving carbon capture at industrial facilities;
- Methane capture projects;
- Projects producing or utilizing sustainable aviation fuel;
- and
- Industrial process changes that reduce emissions.

Starting in 2025, the office is required to report annually on the progress of the clean air grant program, submit the report to the legislative committees with jurisdiction over energy matters, and post the reports on the office's website.

On June 30, 2022, the state treasurer shall transfer $25 million from the general fund to the industrial and manufacturing operations clean air grant program cash fund, which fund is created in the bill. The fund may also consist of money from federal sources and from gifts, grants, and donations. The money in the fund is continuously appropriated to the office for its administration of the clean air grant program.

The clean air grant program is repealed on September 1, 2029.

Section 2 also creates the community access to electric bicycles rebate program (rebate program) through which the office provides individuals in low- and moderate-income households, or bicycle shops that sell electric bicycles to program participants at discounted prices, rebates for purchases of electric bicycles used for commuting purposes.

Starting in 2025, the office is required to report annually on the progress of the electric bicycles grant program and the rebate program, submit copies of the report to the legislative committees with jurisdiction over transportation matters, and post the report on the office's website.

On June 30, 2022, the state treasurer shall transfer $12 million from the general fund to the community access to electric bicycles cash fund, which fund is created in the bill. The fund may also consist of money from federal sources and from gifts, grants, and donations. The money in the fund is subject to annual appropriation by the general assembly to the office for its administration of the electric bicycles grant program and the rebate program.
The electric bicycles grant program and the rebate program are repealed on September 1, 2028.

**Diesel truck emissions reduction grant program. Section 3** creates the diesel truck emissions reduction grant program (diesel trucks grant program) through which the division of administration (division) in the department of public health and environment (department) awards grant money to certain private and public entities for decommissioning diesel trucks and replacing the trucks with newer model trucks. The division is required to determine eligibility for the grant money and the eligible fuel types for qualifying as a replacement vehicle under the diesel trucks grant program.

**Section 4** updates the definition of "federal act" regarding the reference to the federal "Clean Air Act".
definition of "issue" with respect to an order, permit, determination, or notice issued by the division, to remove certified mail and add electronic mail as options to issue such order, permit, determination, or notice.

**Section 5** clarifies that the statutory fee caps for fees collected by the air quality enterprise apply only to the annual stationary source emission fees. The statutory fee caps are $1 million for state fiscal year 2021-22, $3 million for state fiscal year 2022-23, $4 million for state fiscal year 2023-24, and $5 million on and after July 1, 2024.

**Section 6** removes the requirement that the division make the forms on which a person provides details necessary for filing an air pollution emission notice available at all of the air pollution control authority offices.

**Section 7** extends the time within which the commission must grant or deny a request for a hearing from within 15 days after the request was made to within 30 days after the request was made.

Existing law authorizes the commission to submit any additions or changes to the state implementation plan (SIP) to the administrator of the federal environmental protection agency (administrator) for conditional or temporary approval pending legislative council review of the additions or changes. **Section 8** authorizes the commission to submit the changes or additions to the administrator as a provisional submission, pending possible introduction and enactment of a bill to modify or delete all or a portion of the commission's additions or changes to the SIP.

**Section 9** makes a conforming amendment.

**Section 10** appropriates the money transferred from the general fund to the cash funds created in sections 1, 2, and 3 to the office, the division, and the department for their administration of the programs described in sections 1, 2, and 3. Additionally, **section 10** appropriates from the general fund:

- $750,000 to the department of personnel for the costs of issuing free annual eco passes to state employees; and

SECTION 3. In Colorado Revised Statutes, add parts 14 and 15
to article 7 of title 25 as follows:

PART 14
DIESEL TRUCK EMISSIONS REDUCTION
GRANT PROGRAM

25-7-1401. Short title. The short title of this part 14 is the
"DIESEL TRUCK EMISSIONS REDUCTION ACT".

25-7-1402. Legislative declaration. (1) (a) The general
assembly finds that:
(I) Older diesel trucks contribute disproportionate
amounts of localized emissions of particulate matter and
nitrogen oxides in disadvantaged communities where major
interstates bring truck traffic to warehouses, refineries, fleet
yards, and fuel depots;
(II) These localized emissions of particulate matter and
nitrogen oxides negatively affect the health of children,
sensitive populations, and at-risk adults;
(III) Such negative health effects can include asthma, susceptibility to respiratory illness, lung cancer, and premature death;

(IV) Older diesel trucks can be replaced by newer trucks to reduce fuel usage and the related emissions of hazardous air pollutants and criteria emissions that negatively impact air quality;

(V) Small businesses and sole proprietors that own older diesel trucks are less likely than other vehicle owners to have access to the capital or financing required to invest in newer, cleaner models;

(VI) Replacing older diesel trucks with newer trucks with newer safety systems will reduce the chance of breakdowns and vehicle crashes on Colorado’s mountain highways and interstates; and

(VII) Replacing older diesel trucks with newer trucks will also reduce fuel usage, increase fuel economy, and reduce emissions, which will help Colorado comply with air quality attainment standards and reduce greenhouse gas pollution to help Colorado meet its greenhouse gas pollution targets.

(b) The general assembly finds, therefore, that it is appropriate to establish the diesel truck emissions reduction grant program to assist private and public entities in decommissioning older diesel trucks and replacing those trucks with newer trucks.

25-7-1403. Definitions. As used in this Part 14, unless the
CONTEXT OTHERWISE REQUIRES:

(1) "DECOMMISSION" MEANS RENDERING BOTH THE ENGINE AND

PART 15
ELECTRIFYING SCHOOL BUSES

GRANT PROGRAM

25-7-1501. Legislative declaration. (1) The General Assembly finds that:

(a) Disproportionately impacted communities are disproportionately affected by particulate matter and nitrogen oxides arising from fossil-fuel-powered school buses, especially because the fleet yards, warehouses, fuel depots, and interstates used in conjunction with school buses are often located in disproportionately impacted communities;

(b) In addition to exposure to particulate matter and nitrogen oxides in their communities, school children are also exposed to fine particulates and other pollutants as a result of riding on fossil-fuel-powered school buses;

(c) A transition from fossil-fuel-powered school buses to electric-powered school buses will positively affect school children's health, while helping to address long-standing pollution inequities faced by disproportionately impacted communities;

(d) The Federal "Infrastructure Investment and Jobs Act", Pub.L. 117-58, has created a competitive funding program to support the adoption of an electric school bus fleet, and a state program investing in electric school buses will help leverage the federal funds made available through the federal act to allow schools in the state to access the federal funds; and

(e) A transition to electric school buses can provide benefits to the operation of the electric grid in the state:
(I) If the timing of charging electric school buses is managed to support grid operations; and

(II) through the potential for using batteries on electric school buses:

(A) as a source of renewable energy through vehicle-to-grid operations; and

(B) as a community resilience resource to help communities affected by power outages or disasters causing electric grid interruptions.

(2) The general assembly further finds and declares that:

(a) the state should help school districts procure and maintain electric-powered school buses and related infrastructure, convert fossil-fuel-powered school buses to electric-powered school buses, and facilitate the associated retirement of fossil-fuel-powered school buses; and

(b) school districts can leverage state grant money to obtain money from federal and private sources to further finance the transition to an electric-powered school bus fleet.
