Bill Summary

(Note: This summary applies to this bill as introduced and does not reflect any amendments that may be subsequently adopted. If this bill passes third reading in the house of introduction, a bill summary that applies to the reengrossed version of this bill will be available at <http://leg.colorado.gov>.)

For the 2023 property tax year:

- **Section 1** of the bill reduces the valuation for assessment of nonresidential property, excluding agricultural and renewable energy production nonresidential property, from 29% of the actual value of the property to 27.9% of the actual value of the property;
- **Section 2** reduces the valuation for assessment of residential property, including multi-family residential property, to 6.765% of the actual value of the property; and
- **Sections 1 and 3** reduce the actual value used for purposes of the valuation for assessment of commercial real property by \$30,000 and of residential real property by \$15,000, but in either case to no less than \$1,000.

For the 2024 property tax year:

- **Section 1** continues the valuation for assessment of real and personal property that is classified as agricultural property or renewable energy production property at 26.4% of the actual value of the property;
- **Section 2** establishes the valuation for assessment for all residential real property other than multi-family residential real property as a percentage of the actual value of the property based on there being a specific modification determined by the property tax administrator; and
- **Section 2** also establishes the valuation for assessment for multi-family residential real property as 6.8% of the actual

value of the property.

Section 4 requires the adjustment of the ratio of valuation for assessment for all residential real property other than multi-family residential real property for the 2024 property tax year, so that the aggregate decrease in local government property tax revenue during the 2023 and 2024 property tax years, as a result of the bill, equals \$700 million.

Section 5 requires the state treasurer to reimburse counties for the reduction in property tax revenue resulting from the bill during the 2023 property tax year and requires the property tax administrator to report this amount to the general assembly. The state treasurer is required to fully reimburse any county that:

- Received an increase of less than 10% in assessed value of real property between the 2022 and 2023 property tax years; and
- Has a population of 300,000 or less.

The state treasurer is also required to reimburse a county 90% of the amount of the reduction if the county:

- Received an increase of 10% or more in assessed value of real property between the 2022 and 2023 property tax years; and
- Has a population of 300,000 or less.

Lastly, the state treasurer is also required to reimburse any county that does not qualify for full or 90% reimbursement 65% of the amount of the reduction. County treasurers must then distribute these reimbursements to the local governmental entities, excluding school districts, within the treasurer's county as if the revenue had been regularly paid as property tax.

For school districts, **section 6** requires the state treasurer to transfer \$200 million from the general fund to the public school fund to offset school district property tax revenue reductions.

Section 5 also requires the property tax administrator to prepare a report that identifies the aggregate reduction in local government property tax revenue during the 2023 property tax year resulting from the bill.
