equipment manufacturer (manufacturer).

Starting January 1, 2024, the bill requires a manufacturer to provide parts, embedded software, firmware, tools, or documentation, such as diagnostic, maintenance, or repair manuals, diagrams, or similar information (resources), to independent repair providers and owners of the manufacturer's agricultural equipment to allow an independent repair provider or owner to conduct diagnostic, maintenance, or repair services on the owner's agricultural equipment.

The bill folds agricultural equipment into the existing consumer right-to-repair statutes, which statutes provide the following:

- A manufacturer's failure to comply with the requirement to provide resources is a deceptive trade practice;
- In complying with the requirement to provide resources, a manufacturer need not divulge any trade secrets to independent repair providers and owners; and
- Any new contractual provision or other arrangement that a manufacturer enters into that would remove or limit the manufacturer's obligation to provide resources to independent repair providers and owners is void and unenforceable.
