The bill requires the commission to promulgate rules, on or before March 1, 2024, to establish a process for determining whether an owner or operator of a natural gas distribution system (owner or operator) or a customer is responsible for the maintenance and repairs of the portion of the service line, if installed on or after August 14, 1995, and before March 1, 2024, that extends from the gas meter to the customer's primary residential or commercial structure that is serviced with natural gas (customer-owned service line).

The bill also requires the commission to promulgate rules, on or before March 1, 2024, requiring an owner or operator that distributes gas to a customer-owned service line installed on or after March 1, 2024, to:

- Provide written notice to the customer, within 90 days after the installation of the customer-owned service line, informing the customer whether the owner or operator or the customer is responsible for the maintenance and repairs of the customer-owned service line; and
- Obtain a signed copy of the written notice from the customer.

An owner or operator that fails to obtain a signed copy of the written notice must repair and maintain the customer-owned service line for the lifetime of the customer-owned service line.
