A BILL FOR AN ACT

101 CONCERNING WATER USED IN OIL AND GAS OPERATIONS, AND, IN

102 CONNECTION THEREWITH, MAKING AN APPROPRIATION.

Bill Summary

(Note: This summary applies to this bill as introduced and does not reflect any amendments that may be subsequently adopted. If this bill passes third reading in the house of introduction, a bill summary that applies to the reengrossed version of this bill will be available at <u>http://leg.colorado.gov.</u>)

The bill requires an oil and gas operator in the state (operator), on or before January 31, 2024, and at least annually thereafter, to report information to the Colorado oil and gas conservation commission (commission) regarding the operator's use of water entering, utilized at, or exiting each of the operator's oil and gas locations.

The bill also requires the commission to adopt rules requiring that:

SENATE 3rd Reading Unamended May 4, 2023

SENATE Amended 2nd Reading May 3, 2023

Amended 2nd Reading April 20, 2023

HOUSE

- When issuing an operator a new or renewed oil and gas permit on or after June 1, 2024, the commission include as a condition of the permit a requirement that the operator use a decreasing percentage of fresh water and a corresponding increasing percentage of recycled or reused water in the operator's oil and gas operations; and
- Each oil and gas operator, on and after January 1, 2024, report on a monthly basis to the commission about the daily vehicle miles traveled for any trucks hauling water to, within, or from the operator's oil and gas operations in the state.

From the information reported to the commission under the bill, the commission is required to:

- Include the information as part of the commission's annual reporting on cumulative impacts of oil and gas operations;
- Report to the division of administration (division) in the department of public health and environment, on a per-incident basis, any indication of technologically enhanced naturally occurring radioactive material or PFAS chemicals present in produced water; and
- On a quarterly basis, submit a cumulative report to the division and the department of transportation on reported vehicle miles traveled and public roads traveled.

1	Be it enacted by the General Assembly of the State of Colorado:
2	SECTION 1. Legislative declaration. (1) The general assembly
3	finds and determines that:
4	(a) Since the year 2000, Colorado has experienced a drought that,
5	according to the Colorado state university's Colorado water institute, is
6	the most severe drought in the southwestern United States since the year
7	800;
8	(b) The drought has affected every part of Colorado, and
9	agricultural operations throughout the state have been negatively
10	impacted due to reduced water supply for irrigation;
1	(c) In the years 2020 and 2021, the historically dry conditions led
12	to the four most destructive wildfires in recorded state history: and

(d) Compared to twentieth century levels, the flow of the
 Colorado river has declined twenty percent since the year 2000.

3

(2) The general assembly further finds and determines that:

4 (a) One way to conserve water is by increasing the recycling of
5 produced water in oil and gas operations;

6 (b) To reduce the use of fresh water and increase the recycling of 7 produced water in oil and gas operations, the Colorado oil and gas 8 conservation commission, referred to in this section as the "commission", 9 should ensure that it collects robust data regarding the existing use, 10 recycling, and disposal of water in oil and gas operations;

(c) New rules adopted by the commission will also assist in the
reduction of fresh water use and concomitant increase in produced water
recycling; and

(d) A produced water consortium, consisting of individuals with
expertise in produced water, environmental impacts, environmental
justice concerns, and community perspectives, would be helpful for
sorting through the issues related to water use in oil and gas operations,
with the primary goal of the consortium being to reduce the use of fresh
water and increase the recycling of produced water in oil and gas
operations.

21

(3) Therefore, the general assembly declares that:

(a) The collection of oil and gas operations' water use data is
intended to assist stakeholders, the commission, and the public to
determine the best solutions for reducing the use of fresh water and
increasing the recycling of produced water in oil and gas operations;

(b) The commission should adopt new rules to require a rapid and
substantial reduction of the use of fresh water and the increase in the

-3-

1 recycling of produced water in oil and gas operations; and

2 (c) To assist the commission and the public, a produced water 3 consortium should be appointed and should proceed in a collaborative 4 manner, with efforts to achieve consensus among consortium members 5 whenever possible. The consortium is intended to be an informational 6 resource for the commission and the public and is not intended to be a 7 party participant in any commission rule-making proceedings. 8 SECTION 2. In Colorado Revised Statutes, add 34-60-134 and 9 34-60-135 as follows: 10 34-60-134. Reporting of water used in oil and gas operations 11 - cumulative reporting - definitions - rules - repeal. 3 **SECTION 4.** Appropriation. (1) For the 2023-24 state fiscal 4 year, \$464,512 is appropriated to the department of natural resources for 5 use by the Colorado oil and gas conservation commission. This 6 appropriation is from the oil and gas conservation and environmental 7 response fund created in section 34-60-122 (5)(a), C.R.S., and is based on 8 an assumption that the commission will require an additional 4.0 FTE. To 9 implement this act, the commission may use this appropriation for 10 program costs.
