If this bill passes third reading in the house of introduction, a bill summary that applies to the reengrossed version of this bill will be available at <http://leg.colorado.gov>.)

Section 2 of the bill removes the requirement that the air quality control commission (AQCC) promulgate rules setting the conditions and limitations for periods of start-up, shutdown, or malfunction of a source of air pollution (source) that justify temporary relief from an emission control regulation.

Current law provides that a person shall not permit the emission of air pollutants at a nonresidential structure unless an air pollution emission notice has been filed with the division of administration in the department of public health and environment (division). **Section 5** adds the requirements that any:

- Relevant permits have been approved by the division; and
- Applicable period of review by the federal environmental protection agency has been completed.

Section 6 removes the prohibition against the AQCC adopting rules covering indirect sources that are more stringent than applicable federal law.

Section 6 also requires the division, in evaluating a construction permit application for a source that includes new oil and gas operations, to:

- Aggregate emissions from a proposed or modified oil and gas system; and
- Consider emissions from exploration and preproduction activities if a proposed or modified oil and gas system is in an ozone nonattainment area and if the activities will be conducted beginning May 1 and ending August 31 of any year (ozone season).

Section 8 clarifies that only the filing of a renewable operating permit application can operate as a defense to an enforcement action for operating without a permit during the time period that the division or the AQCC is reviewing the permit application.

Current law requires the division or the AQCC to give public notice of certain construction permit applications or renewable operating permit applications and of certain public hearings through a newspaper publication or another method that ensures effective public notice. Current law also requires the division to maintain a copy of a construction permit application and applicable preliminary analysis or a notice of public hearing with the county clerk and recorder of the county where the applicable project is located. **Section 8** also removes the newspaper publication option and the county clerk and recorder filing requirements and provides for alternative methods of giving public notice, including posting information about the application or any public hearings on the division's or the AQCC's website.

Current law requires the division or AQCC to make a finding that a source or activity will meet all applicable emission control regulations, including ambient air quality standards (AAQS), before granting a permit for the source or activity. **Section 8** also requires that, beginning January 1, 2024, for at least any source or activity that has the potential to emit levels of air contaminants above certain modeling thresholds, the division or AQCC must base any finding that the source or activity will not cause or contribute to an exceedance of applicable AAQS on air quality

modeling.

Section 8 also allows the division, after an investigation into whether an activity meets the requirements of a construction permit, to propose additional terms and conditions of the construction permit.

With respect to a complaint alleging or the division's own belief regarding a violation or noncompliance (violation), **section 9** requires the division to:

- Cause a diligent investigation into the violation to be made unless the complaint clearly appears to be frivolous or trivial or the complainant withdraws the complaint;
- Notify the owner or operator of the applicable air pollution source of the complaint or the division's belief of an alleged violation within 30 days after the complaint was filed or the division discovered the alleged violation;
- Consider all relevant evidence that it acquires when investigating the alleged violation; and
- Determine whether a violation occurred within 90 days after the division gives notice that it has commenced an investigation on the matter.

If the division determines that a violation has occurred, current law requires the division to issue a compliance order unless the responsible party gives timely notice that the violation occurred during a period of start-up, shutdown, or malfunction. **Section 9** removes the exception for periods of start-up, shutdown, or malfunction.

Section 9 also requires, if a hearing is requested after the receipt of a compliance order, the commission to provide at least 45 days' notice to any complainant that submitted a complaint alleging the applicable violation.

Section 9 also allows a complainant to submit a request for a hearing within 20 calendar days after receipt of a determination by the division that no violation occurred.

Current law provides that any noncompliance that occurs during a period of start-up, shutdown, or malfunction exempts the owner or operator of a source from the duty to pay penalties related to that noncompliance. **Section 9** removes this provision.

Section 9 also allows a person, with respect to certain clean air regulations, to commence a civil action (action) against an alleged violator for a current or past violation of the regulation. A person shall not commence an action until at least 60 days after a notice has been provided to the executive director of the department, the director of the division, and the alleged violator. Except for violations of an ongoing or recurring nature, any action that is not commenced within 5 years after the discovery of the alleged violation is time barred.

Current law requires the division to consider certain factors in determining the amount of a civil penalty to assess for a violation.

Section 10 requires the division to also consider the impact of the violation on safety and wildlife and biological resources and the severity of the violation.

Current law provides that any action related to an alleged violation of air quality laws that is not commenced within 5 years after the occurrence of the alleged violation is time barred. **Section 11** excludes actions commenced to address a failure to obtain a permit from this statute of limitation.

Section 12 creates new electrification requirements and emissions standards for stationary engines used in oil and gas operations.

Section 13 creates new control measures that must be included in any state implementation plan for ozone adopted by the AQCC until a serious, severe, or extreme ozone nonattainment area in the state is redesignated as a maintenance area by the federal environmental protection agency.

Section 15 requires the district court, in a suit against a person that has violated a state law, rule, or order related to oil and gas, to award the initial complaining party any costs of litigation incurred by the initial complaining party if the court determines that the award is appropriate.

Section 16 allows any person to submit a complaint to the oil and gas conservation commission (COGCC) alleging a violation of a state law, rule, or order related to oil and gas. Upon receipt of the complaint, the COGCC or the director of the COGCC is required to promptly commence and complete an investigation into the violation alleged by the complaint, unless the complaint clearly appears on its face to be trivial or the complainant withdraws the complaint.

Section 17 requires the COGCC to evaluate and address adverse cumulative impacts on the environment and disproportionately impacted communities for each permit application for a new or substantially modified oil and gas location through a cumulative impact analysis.

1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Legislative declaration.** (1) The general assembly
3 finds that:

4 (a) All people have the right to breathe clean air, yet poor air
5 quality frequently puts public health at risk in communities across
6 Colorado, particularly in disproportionately impacted communities that
7 are subjected to adverse cumulative impacts from multiple pollution
8 sources;

1 (b) In particular, Coloradans have long suffered from high levels
2 of ground-level ozone pollution, which is connected to severe health
3 impacts including respiratory problems, cardiovascular disease, adverse
4 birth outcomes, and premature death and poses a significant threat to
5 vulnerable populations including children, the elderly, people with
6 respiratory ailments, the outdoor workforce, and otherwise healthy
7 individuals who recreate outdoors;

8 (c) The threats posed by ozone pollution are even more
9 devastating for communities of color and low-income communities that
10 bear outsized environmental burdens due to past and present
11 discriminatory environmental policies, endure higher health risks from
12 exposure, experience systemic injustice, and have faced exclusion from
13 government decision-making and enforcement efforts;

14 (d) Although Colorado has an ongoing ozone crisis that will
15 worsen with climate change, the state has repeatedly failed to meet
16 federal ozone standards established to protect public health and welfare
17 in the Denver metro/North Front Range nonattainment area where a
18 majority of Coloradans live, which was downgraded to a severe
19 nonattainment area in 2022 and has been consistently ranked among the
20 worst areas in the nation for ozone pollution by the American lung
21 association;

22 (e) The federal "Clean Air Act" requires that Colorado have
23 enforceable procedures in place to assess the air quality impacts of new
24 sources and modifications and to prevent the construction of new sources
25 and modifications that would cause or contribute to a violation of federal
26 standards;

27 (f) "Minor" sources of pollution, including many oil and gas

1 sources that are among the largest contributors to ozone, can cause and
2 contribute to exceedances of federal standards and have a devastating
3 cumulative impact on already overburdened, disproportionately impacted
4 communities, yet they often escape air quality impact analyses in
5 Colorado's permitting processes;

6 (g) Impacted Coloradans across the state face significant barriers
7 and a lack of transparency when filing complaints and submitting
8 evidence of permit violations and action is necessary to ensure that
9 agencies are empowered to respond to complaints appropriately; and

10 (h) Because industrial operations also support many jobs in
11 Colorado, impacts on workers associated with air quality control
12 measures should be considered.

13 (2) The general assembly determines that state action to reduce
14 pollution is necessary to achieve environmental justice, and the state can
15 and should act to lower ozone and precursor levels to address the serious
16 health impacts experienced by communities across Colorado, especially
17 as the impacts of the climate crisis intensify.

18 (3) Therefore the general assembly determines and declares that:

19 (a) State agencies have a duty and a responsibility to collaborate
20 to protect Coloradans from harmful pollution and to comply with federal
21 health-based standards, which are essential steps in achieving
22 environmental justice and health equity for all communities;

23 (b) Extraordinary air quality measures should be included in the
24 state implementation plan for ozone when the federal environmental
25 protection agency classifies a nonattainment area in the state as a serious,
26 severe, or extreme nonattainment area;

27 (c) It is imperative for members of the public to be meaningfully

1 engaged as partners and stakeholders in Colorado's permitting processes
2 and enforcement of permit violations once permits are issued; and

3 (d) This act is necessary to ensure that Colorado addresses the
4 disproportionate cumulative impacts of pollution, including
5 environmental and health impacts, that communities across the state
6 experience.

7 **SECTION 2.** In Colorado Revised Statutes, **add 25-7-145** as
8 follows:
